This information can be available to other interested parties and relevant organizations:

☑ YES
☐ NO
☐ Partially, only the following forms:

A ☐ B ☐ C ☐ D ☐ E ☐ F ☐ G ☐
**Form A**  

**Dissemination of information**

| Article 13, paragraph 4 (a) | “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(a) dissemination of information on this Protocol to their armed forces and to the civilian population;” |

**Remark:**

**High Contracting Party:**  

Japan

**Reporting for time period**

| from: 01/08/2005 | to: 31/07/2006 |
| dd/mm/yyyy | dd/mm/yyyy |

**INFORMATION TO THE ARMED FORCES:**

The significance and outline of this Convention and Protocol are dealt with in various educational courses for Self-Defense Forces personnel. Specific obligations are also instructed to the personnel concerned.

**INFORMATION TO THE CIVILIAN POPULATION:**

The official web site of the Ministry of Foreign Affairs and the booklet edited by Disarmament, Non-proliferation and Science Department, Ministry of Foreign Affairs (*Japan’s Disarmament and Non-Proliferation Policy*) provide the information of the Convention and the Protocols.
**Form B**

**Mine clearance and rehabilitation programmes**

| Article 13, paragraph 4 (b) | “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(b) mine clearance and rehabilitation programmes;” |

*Remark:*

**High Contracting Party:**  

Japan  

**Reporting for time period**

**MINE CLEARANCE PROGRAMMES:**  
Japan does not need such programs since there is no mined area under the control of the Government of Japan.

**REHABILITATION PROGRAMMES:**  
Japan does not need such programs since there is no mined area under the control of the Government of Japan.
**Form C**

**Technical requirements and relevant information**

| Article 13, paragraph 4 (c) | “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(c) steps taken to meet technical requirements of this Protocol and any other relevant information pertaining thereto;” |

**Remark:**

High Contracting Party:

Japan

Reporting for time period from: 01/08/2005 to 31/07/2006

**TECHNICAL REQUIREMENTS:**

No additional measures were taken during the reported period.

**ANY OTHER RELEVANT INFORMATION:**

Fulfilled technical requirements of the Amended Protocol II. Current status is as follows.

1. Recording: Japan conforms to Technical Annex ‘1. Recording’.

2. Specification on detectability: No measures are necessary for Japan, because ‘Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-personnel Mines and on Their Destruction’ came into effect for Japan on 1st March 1999.

dd/mm/yyyy
dd/mm/yyyy

**LEGISLATION:**
The Government of Japan takes legislative measures in accordance with Article 88 of the Self-Defense Forces Act to prevent and suppress violation of Amended Protocol II.

As for the transfers, the Government of Japan controls the arms exports based on the Foreign Exchange and Foreign Trade Act and its relevant legislations. The exports of arms, listed as the Item 1 of the Appended table 1, Export Trade Control Order, require export licenses to all destinations. Mines fall under the Item 1 (2) “Explosives” and are subjected to regulation.

As for the Article 14.2 of Amended Protocol II, the Government of Japan takes legislative measures such as Article 199 and Article 204 of Penal Code, Article 1 of Explosive Control Act, and other relevant legislations.

On April 1, 2014, Government of Japan, in accordance with the National Security Strategy adopted on December 17, 2013, set out “the Three Principles of Transfer of Defense Equipment and Technology” as a set of new principles on overseas transfer of defense equipment and technology, which replace “the Tree Principle on Arms Exports and Their Related Policy Guidelines.”

The Three Principles on Transfer of Defense Equipment and Technology

1. Clarification of cases where transfers are prohibited
Overseas transfer of defense equipment and technology will not be permitted when:
1) the transfer violates obligations under treaties and other international agreements that Japan has concluded,
2) the transfer violates obligations under United Nations Security Council resolutions, or
3) the defense equipment and technology is destined for a country party to a conflict (a country against which the United Nations Security Council is taking measures to maintain or restore international peace and security in the event of an armed attack).

2. Limitation to cases where transfers may be permitted as well as strict examination and information disclosure
In cases not within 1. above, cases where transfers may be permitted will be limited to the following cases. Those cases will be examined strictly while ensuring transparency. More specifically, overseas transfer of defense equipment and technology may be permitted in such cases as the transfer contributes to active promotion of peace contribution and international cooperation, or to Japan’s security from the viewpoint of...
AMENDED PROTOCOL II

- implementing international joint development and production projects with countries cooperating with Japan in security area including its ally, the U.S. (hereinafter referred to as “the ally and partners”),
- enhancing security and defense cooperation with the ally and partners, as well as
- supporting the activities of the Self-Defense Forces including the maintenance of its equipment and ensuring the safety of Japanese nationals.

The Government will conduct strict examination on the appropriateness of the destination and end user, and the extent the overseas transfer of such equipment and technology will raise concern for Japan’s security. Then the Government will make a comprehensive judgment in light of the existing guidelines of the international export control regime and based on the information available at the time of export examinations.

Significant cases that require especially careful consideration from the viewpoint of Japan’s security will be examined at the National Security Council (NSC). As for the cases that were deliberated at the NSC, the Government will disclose their information in accordance with the Act on Access to Information Held by Administrative Organs (Law No. 42 of 1999).

3. Ensuring appropriate control regarding extra-purpose use or transfer to third parties

In cases satisfying 2. above, overseas transfer of defense equipment and technology will be permitted only in cases where appropriate control is ensured. More concretely, the Government will in principle oblige the Government of the recipient country to gain its prior consent regarding extra-purpose use and transfer to third parties.
**Form E**  
**International technical information exchange, cooperation on mine clearance, technical cooperation and assistance**

Article 13, paragraph 4 (e)  
“The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(e) measures taken on international technical information exchange, on international cooperation on mine clearance, and on technical cooperation and assistance;”

*Remark:*

**High Contracting Party:**  
Japan

**Reporting for time period from:**  
01/04/2018  
**to:**  
31/03/2019

dd/mm/yyyy  
dd/mm/yyyy

**INTERNATIONAL TECHNICAL INFORMATION EXCHANGE:**

|  
|  

**INTERNATIONAL COOPERATION ON MINE CLEARANCE:**

See the attached form Annex to Form E.

**TECHNICAL COOPERATION AND Assistance:**

See the Attached form Annex to Form E.  
The Japan International Cooperation Agency (JICA) also facilitates south-south cooperation between landmine/ERW affected countries.
Form F  Other relevant matters

Article 13, paragraph 4 (f)  “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(f) other relevant matters.”

Remark:

High Contracting Party: Japan

Reporting for time period from: 01/08/2005 to: 31/07/2006

OTHER RELEVANT MATTERS:
The destruction of stockpiled anti-personnel mines began on January 17, 2000, and in accordance with the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-personnel Mines and on Their Destruction, all stockpiled anti-personnel mines were destructed with the exception of a minimum necessary number by February 8, 2003.

At the First Review Conference of the Ottawa Convention which was held in Nov. 2004, Japan announced its new policy on assistance for mine action which includes the following 3 principles; Consolidation of peace; Human security; Close cooperation between governments, NGOs, the private sector and academia, and as part of this cooperation, Japan will continue to support research and development of technologies in support of mine action.
Form G  Information to the UN-database on mine clearance

Article 11, paragraph 2, “2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance.”

Remark:

High Contracting Party:

Japan

Reporting for time period from: 01/08/2005 to: 31/07/2006

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

The government of Japan has supported several Japanese and international non-governmental organizations that have the means for various aspects of mine actions, including humanitarian demining, mine risk education, victim assistance, etc.

Japan has also been actively supporting research and development on new mine clearance technologies to enhance efficiency and safety of mine action, in cooperation with Japanese manufacturers and laboratories, while emphasizing capacity building for the end-users of the new technologies.

More information can be obtained through national points of contact on mine-related matters.

LISTS OF EXPERTS AND EXPERT AGENCIES:

Information pertaining to Japanese mine action experts and expert agencies can be obtained through national points of contact on mine-related matters.

NATIONAL POINTS OF CONTACT ON MINE CLEARANCE:

Japan’s national point of contact on mine-related matters is as follows.
