CONVENTION ON CERTAIN CONVENTIONAL WEAPONS
AMENDED PROTOCOL II

Form A  Dissemination of information

Article 13, paragraph 4 (a)  “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(a) dissemination of information on this Protocol to their armed forces and to the civilian population;”

Remark:

High Contracting Party:  
THE REPUBLIC OF CROATIA

Reporting for time period
from: 01/01/2017 to: 31/12/2017

dd/mm/yyyy  dd/mm/yyyy

INFORMATION TO THE ARMED FORCES:

Since Croatia is the State Party to the Convention on Cluster Munitions, that Convention is added to the curriculum of the Croatian Defence Academy. The introduction of the Convention on Cluster Munitions to the Croatian Armed Forces was used to reshape and expand the curriculum time dedicated at all levels of education on the agreements, treaties and conventions signed and ratified by Croatia. Starting at basic, advance and senior NCO courses it expands and gets more in-depth coverage all the way up to the War College level. This expanded curriculum is being implemented from the beginning of September 2011 and is regularly updated.

INFORMATION TO THE CIVILIAN POPULATION:

Dissemination of information about the CCW and its protocols to civilian population is performed through mine risk education (MRE) activities. Croatian Ministries, Offices of the Government and State Administrative Offices as well as NGOs, pass specific training according to their role in the national implementation of the Convention and its Protocols. Croatian Red Cross with its local branches (in local communities), Croatian Mine Action Centre (CROMAC), the Ministry of Interior and the Association of Civil Victims of Homeland War are active in events and lectures where MRE messages are given. These lectures always bear in mind that mine risk education is effective in terms of reducing the number of mine casualties. Appropriate presentations (lectures) on mine/UXO risk education were organised for children, adults, and for specific target groups (hunters, farmers, firemen, mountaineers, fishermen, public companies employees etc.).

Promotion to the public and the media is an especially important way to directly spread safety messages about the dangers of ERW, which seeks to inform as many citizens at the local and national level. Creating and distributing posters, flyers, brochures, etc. and publishing news stories in print and electronic media (radio and TV spots) reaches a significantly larger number of citizens, and further points to the still present danger of landmines in Croatia.
The Croatian Police Department is continuing its "Fewer arms, less tragedies" program in partnership with the CROMAC and the Croatian Red Cross. Citizens are being educated and encouraged to turn in their weapons and explosive ordnance left from the Homeland War. The Croatian Police Department also reacts on basis of citizen’s telephone calls and sometimes discovers large quantities of weapons within their investigations of various criminal activities. Realizing the scope of the problem in Croatia, the Police Department is continuing this program in the future.
Form B  Mine clearance and rehabilitation programmes

Article 13, paragraph 4 (b)  “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:

(b) mine clearance and rehabilitation programmes;”

Remark:

High Contracting Party:  THE REPUBLIC OF CROATIA

Reporting for time period from:  01/01/2017  to:  31/12/2017

MINE CLEARANCE PROGRAMMES:

The Republic of Croatia confirmed its determination to solve the mine problem by passing the Law on Humanitarian Demining in 1996, establishing the Croatian Mine Action Centre in 1998, fulfilling the commitments undertaken by joining the Ottawa Convention as well as providing for permanent and stable sources of financing from the State Budget, the World Bank loans, EU funds and Croatian public companies.

In 2012, the Office for Mine Action was established by the Government of the Republic of Croatia ("Official Gazette", 21/12) as a governmental body for technical, analytical, advisory, co-ordinating and other activities related to mine action in Croatia. As such, it also closely monitors the activities and work of the CROMAC. One of the main goals of the Office is to raise the awareness of population about the danger of mines, as well as to create conditions for effective development of mine action in Croatia.

Through 73 preliminary demining projects, mine threat has been removed from an area that amounts to 29.9 km² while additional 6.6 km² was reduced through technical and non-technical survey activities. All these activities resulted in the total decrease of the suspected hazardous area in Croatia in the amount of 36.5 km² (+481,900 m² demined territory by MoD). Suspected hazardous area in the Republic of Croatia on December 31, 2017 totalled 411.5 km².

In 2017, the largest share in the demined area had areas planned for different economic activities like forest areas and especially agricultural land which the local and regional authorities stated as their priority crucial for the start of agricultural production and other activities. During the mine clearance activities a total number of 1,808 mines and UXOs was found and destroyed, out of which 1,289 mines and 519 UXOs, performed by 40 accredited commercial companies that
conducted demining operations.

The Annual Mine Action Plan was realized using the following funding sources - State Budget funds, EU funds and donations. It is important to mention that, like in the previous reporting year, in 2017, funds acquired for the demining operations from the EU contribution surpassed the ones from the State budget and other sources. In 2017, EU funds had the biggest financing share with 58,48% of total funds spent and contracted (State budget 40,75%, donations 0,76%). Parallel with the implementation of the non-technical survey and search and demining operations, the control of marking and, if necessary, additional marking of suspected hazardous areas was conducted in order to create a clear boundary between safe and mine suspected areas. The locations of mine danger signs are one of the basic elements of the Mine Information System (MIS) that is shown on the maps given to the local authorities, police administration and individuals that have requested maps on SHA situation. On December 31, 2017 total mine suspected area was marked with 13.563 mine danger signs, which means 15% increased marking per square kilometre in comparison to previous reporting year, emphasized by the fact of reduced total SHA.

Certain amount of Croatian military facilities including barracks, training areas, radar stations and storage sites are still partially contaminated by land mines, cluster munitions remnants and other UXO. The Demining battalion of the Engineering regiment is responsible for clearance of all military facilities. During 2017, an area of 481.900 m² was searched and cleared. 297 pieces of UXO were discovered and destroyed; while AP and AV landmines were not found during the process.

The Ministry of Interior is continuing its "Fewer arms, less tragedies" Programme in partnership with the CROMAC and the Croatian Red Cross. The citizens are being educated and encouraged to turn in their weapons and ordnance left from the Homeland War. Among large arsenals of SALW and other weapons, during 2017 MoI collected 122 pieces of AP and 22 pieces of AV landmines.

REHABILITATION PROGRAMMES:

In line with the Law on Mine Action, Mine risk education and Mine victims’ assistance was conducted during this period with co-ordinative role of the Government Office for Mine Action and CROMAC and co-operation with non-governmental organizations, different institutions and international organizations and associations.

Mine/UXO risk education

Different mine risk education activities, marking of mine suspected area, possibility of getting an insight into mine situation through submission of MSA maps and CDs as well as using CROMAC web portal have a positive effect on the prevention of mine incidents, but also require additional activities of informing the public and media with different mine action aspects.

In 2017, there were no mine incidents / accidents or related casualties in the Republic of Croatia.

In 2017, the Croatian Mine Action Centre coordinated a large number of activities related to informing about mine danger. Through 77 lectures and presentations, more than 27.890 citizens were educated in 2017. Majority of them were kindergarten and elementary school children. Special education was given to the members of hunting associations, Croatian mountain rescue service, hikers, farmers and tourists. Education was provided in Capital of Zagreb and 14 other counties.

The largest number of activities related to the education about dangers of mines and UXO were done in cooperation with the Ministry of Interior and the relevant police departments through the "Less arms, less tragedy" campaign where more than 26.800 people were educated as a part of 66 organized lectures. The cooperation was also achieved with: Croatian Hunting Federation,
Croatian Red Cross, “Lions club” Beli Manastir, Disability Volleyball Club Zagreb, county, city and municipal governments and other non-governmental organizations and associations.

All actions and activities in Mine Action in Croatia and worldwide were presented on web pages of CROMAC and the Government Office for Mine Action. Central ceremony for the April 4, International day of Mine Awareness and Assistance in Mine Action was held in the town of Glina in co-organisation of Government Office for Mine Action and CROMAC.

**Providing assistance to mine victims**

The Republic of Croatia has developed public health care structure that includes clinics, clinical centres, specialized polyclinics, hospitals and rehabilitation centres. All persons being involved in the incidents are entitled to health protection and acquisition of orthopaedic aids to the amount covered by the Croatian Health Insurance Institute. These rights are regulated by a number of laws, rules and regulations. Relevant state administration authorities were involved in solving the problems of mine victims relating to medical rehabilitation. In accordance with the Act on Mine Action, mine victims assistance was conducted with Government Office for Mine Action’s coordinative role and in co-operation with relevant ministries, institutions and NGOs. The main goal of these activities is to improve the quality of life of people injured by mines and UXOs as well as their families. Competent government authorities dealt with problems of mine victims in the part of medical rehabilitation. Other forms of aid were mainly implemented by non-governmental sector, and funding was secured through donations from international and domestic entities.

Most importantly, the Government Office for Mine Action and the CROMAC continued to provide advisory support to mine victims and their families and to collect data on mine victims and their needs during the process of non-technical survey. Swiss-Croatian Cooperation programme trough "Demining and Socio-economic Integration" project and correlated socio-economic component has a goal of establishing functional mine victims’ data base which will serve as a basis for developing further and strengthened policy actions for mine victims.

The Republic of Croatia has highly developed legal framework relating to the persons with disabilities in realizing their legitimate rights and status. The status and various forms of rights are being realized through over 200 different laws and by-laws. There are 4 basic forms of mine victim assistance in which ministries, institutions, non-governmental sector, a number of organizations and individual initiatives take part in, such as medical care, physical rehabilitation, psychological help and social reintegration and professional and economic rehabilitation.

There are 29 specialized hospitals for physical rehabilitation in Croatia and one Institute for rehabilitation and orthopedic aids in Zagreb. Centers for psychosocial help and assistance in all 20 counties of the Republic of Croatia and City of Zagreb were opened, aiming at providing the assistance to all people with disabilities including mine victims with war traumas including mine victims and members of their families.

Additional payment for better quality prostheses in the amount of 7.000 to 50.000 HRK is the most frequent form of individual support. Several dozens of persons ask for such type of support each year.

**Collective programs of rehabilitation and reintegration**

NGO "Mine Aid" continued supporting mine victims through several projects. During 2017, the advisory assistance to persons affected by mines, and their families continued to be provided by Mine Aid.
International technical information exchange, cooperation on mine clearance, technical cooperation and assistance

Article 13, paragraph 4 (e) “The High Contracting Parties shall provide annual reports to the Depositary […] on […]:
(e) measures taken on international technical information exchange, on international cooperation on mine clearance, and on technical cooperation and assistance;”

Remark:

High Contracting Party: THE REPUBLIC OF CROATIA

Reporting for time period from: 01/01/2017 to: 31/12/2017

INTERNATIONAL TECHNICAL INFORMATION EXCHANGE:

Based on the Agreement on the transfer of tasks, Article 2, signed between the Croatian Mine Action Centre and CROMAC - Center for Testing, Development and Training (HCR-CTRO) on 30 October 2003, HCR-CTRO took over the activities and projects focused on testing of mine detection and mine clearance equipment, as well as research of new methods and technology.

Technical cooperation:

- In November, 2017 – beginning of the project entitled “Biological Methods (Bees) for Explosive Detection” financed by the NATO Science for Peace and Security Programme. The participants of the project are: HCR-CTRO d.o.o. - project coordinator, Faculty of Transport and Traffic Sciences from the University of Zagreb, University from Banja Luka and University from St. Andrews. Duration of the project is three years, and its goal is to develop innovative methods and technologies for landmine detection through the advancement and integration of current state of the art techniques – honeybees in combination with explosive vapour sensors and advanced imaging techniques.

Testing and certification:

At the HCR-CTRO test sites in Cerovac / Benkovac:

- In May and October, 2017 - At the HCR-CTRO test site Benkovac, a research team from the University of Manchester conducted a trial of experimental detection equipment. The aim of the project is to help counter the problems of discrimination of targets in uncooperative (highly mineralised) soils and to research more advanced electromagnetic detectors to the benefit of the international mine action community. The trial is financed by the British charity “Find a Better Way”. 
During September, 2017 - HCR-CTRO d.o.o. provided testing of a Zone Depollution System (SDZ) machine owned by a French company CEFA. The test took four weeks and was conducted in accordance with the IMAS Test and Evaluation Protocol for machines (CWA 15044).

**Training:**
One of the main fields of expertise of HCR-CTRO is training. Training courses are conducted in accordance with IMAS and Testing and Evaluation Protocols. In 2017, the following training courses were conducted for international partners:

- During October, 2017 - HCR-CTRO d.o.o. conducted training for 18 employees of the Russian company EMERCOM DEMINING on the subject of mine clearance management. EMERCOM DEMINING employees gained qualifications for project managers, site managers, group leaders and internal control inspectors.

**Conferences and workshops:**

- Croatian Mine Action Centre, HCR-CTRO and Government Office for Mine Action organized the 14th International Symposium "MINE ACTION 2017" which was held in the Town of Biograd in April 2017. The Symposium has become a global umbrella gathering of mine action experts and practitioners. Some 150 participants from more than 30 countries attended the Symposium, during which different plenary sessions, a field demonstration of demining and detection equipment, a demonstration of technical survey activities, as well as workshops and working meetings of IARP (International Advanced Robotic Programme) and SEEMACC (South East Europe Mine Action Coordination Council) were held.

- During March and April, 2017 - Regional Senior Managers' Course in ERW and Mine Action was held in Croatia, organised jointly by the Center for International Stabilization and Recovery at James Madison University (JMU) USA, the Government Office for Mine Action of the Republic of Croatia and Croatian Mine Action Centre - Centre for Testing, Development and Training, funded by the Office of Weapons Removal and Abatement in the U.S. Department of State’s Bureau of Political-Military Affairs. The Course gathered 20 participants, attending from CWD programs in Albania, Armenia, Azerbaijan, Bosnia and Herzegovina, Croatia, Georgia, Kosovo, Serbia, Slovenia, Turkey and Ukraine. Three participants from Colombia also joined the course to take advantage of the excellent working relationship already established between the Croatian and Colombian mine action authorities and to learn from the programs in Europe and Eurasia. This course strengthened regional partnerships and collaboration and focused on issues critical to the region, including program sustainability, small arms and light weapons, physical security and stockpile management, and managing programs through transitional phases.
INTERNATIONAL COOPERATION ON MINE CLEARANCE:
The international cooperation on mine clearance of the Republic of Croatia during the above mentioned period was performed thanks to the donors’ contributions from different countries, organizations and individuals. European Union, US and other countries financed humanitarian demining activities in Croatia in 2017.

TECHNICAL COOPERATION AND ASSISTANCE:
Cooperation on international level required close cooperation between the Government Office for Mine Action, the CROMAC, the Ministry of Foreign and European Affairs, Croatian diplomatic missions throughout the world and the Ministry of Defense. Apart from fulfilment of the commitments undertaken by Croatia signing the Ottawa Treaty, international cooperation activities have mostly consisted of raising demining funds, capacity building, mine victims assistance and mine risk education. International cooperation also included taking part in different conferences at regional and international level that enabled us to promote and present achievements of Croatian mine action system.

- In November, 2017 - CROMAC and HCR-CTRO d.o.o. hosted a delegation of the Saudi Arabia which included representatives from the Engineering Command, Infantry Command, Armed Forces Command, Office of the Chief of Staff and the Navy Command of the Ministry of Defence of the Kingdom of Saudi Arabia. Guests were presented with the activities of all Mine Action authorities in the Republic of Croatia, with a special emphasis on a system of the airborne non-technical survey from a drone, training courses and quality management.
- In December, 2017 - CROMAC and HCR-CTRO d.o.o. delegation visited Ukraine. The visit was organized under the auspices of the Working Group on cooperation between Croatia and Ukraine on the exchange of experiences in demining and their adaptation/implementation in Ukraine.
Form G  Information to the UN-database on mine clearance

Article 11, paragraph 2, “2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance.”

Remark:

High Contracting Party: THE REPUBLIC OF CROATIA

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

Mine clearance capacities include a complete equipment of 40 commercial demining companies that are authorized by the Ministry of Interior to perform mine clearance activities.

All the employees that work in mine clearance (approx. 600) are wearing protective equipment that consists of flack jacket with protection for groins and helmets with visors. For special cases of UXO demolition, companies use ballistic suits. Following equipment is in usage for humanitarian demining activities: approximately 650 metal detectors, 50 demining machines including all types (medium, light and heavy), excavators, machines for vegetation clearing and 60 mine detection dogs.

In Croatia, mine clearance actions are mostly performed as a combination of mechanical demining, manual detection and mine-searching dogs. CROMAC’s Standard Operating Procedures (SOPs) also prescribe the entire methodology of humanitarian demining activities. Frequent use of demining machines puts Croatia among the leading states with industrial mine clearance.

LISTS OF EXPERTS AND EXPERT AGENCIES:

Mine clearance experts are employed in various institutions, which deal with mine action issues

CROMAC:
- Mr. Zdravko Modrušan – Director
- Mr. Ante Brkljačić – Survey and Quality control
- Mr. Davor Laura – EU funds and planning
- Mr. Neven Karas – General affairs sector
- Heads of CROMAC Regional offices (Mr. Josip Čerina, Mr. Dubravko Krušarovsky) – operational performance

HCR-CTRO d.o.o. conducts testing and certification of mine detection and mine clearance equipment; research and development of new mine detection and mine clearance methods and technology; and training in the field of mine action.
During 2017, there were 40 commercial companies that were authorized by the Ministry of the Interior and competed in public tenders for mine clearance projects:
