LEGISLATION:
No change to the previous reports.  
In accordance with Czech law, promulgated treaties, to the ratification of which the Parliament has given its consent and by which the Czech Republic is bound, form a part of the legal order; if a treaty provides something other than that statute provides, the treaty shall apply. That means that the Convention and its annexed Protocols are self-executing in the Czech Republic.

The Criminal Code of the Czech Republic No. 40/2009 of the Collection of Laws includes paragraph No. 280, called “Development, production and possession of prohibited means of combat”. This provision determines that it is a crime to develop, produce, import, export, store or accumulate weapons or means of combat prohibited by law or international treaty, or to dispose of these weapons or means of combat in any other way. This provision further determines possible punishment for such a crime – imprisonment for a term of two years up to eight years.

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:
The engineer units of the Armed Forces of the Czech Republic are equipped with the Midi-flail mine clearance system BOZENA 5 (hereinafter referred as BOZENA). BOZENA is a tracked mechanical mine clearing machine remotely controlled by a transmitter with a range of 2,000 m, meant for clearing anti-personnel mines both pressure and tripwire fused and for anti-tank mines up to 9 kg of TNT charged. The system is suitable for clearing large mine affected areas. It can be road transported on trailer between working areas. BOZENA is protected from detonations by an armoured shield situated at the front of the vehicle, directly behind the flail. In addition, the whole machine is protected with an armoured metal covering, giving protection against damage from detonations.
