

**REPORTING FORMS  
PURSUANT TO ARTICLE 10, PARAGRAPH 2 (b) OF THE PROTOCOL AND THE  
DECISION OF THE FIRST CONFERENCE OF THE HIGH CONTRACTING  
PARTIES TO PROTOCOL V**

(As adopted by the First Conference at its second plenary meeting on 5 November 2007)

---

HIGH CONTRACTING  
PARTY:

CANADA  
-----

NATIONAL POINT(S) OF CONTACT (Organization, telephones, fax, e-mail):

John MacBride, Department of Foreign Affairs and International Trade, tel: 1-613-944-3009, fax: 1-613-944-2501, john.macbride@international.gc.ca

DATE OF 18/05/2010  
SUBMISSION: -----

(dd/mm/yyyy)

This information can be available to other interested parties and relevant organizations

**YES**

**NO**

~~Partially, only the following forms:~~

**A B C D E F G H I**

**FORM A:** Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

---

High Contracting  
Party:

CANADA

---

Reporting for time period from:

19/11/2009

[dd/mm/yyyy]

to

31/12/2009

[dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 3:

During the reporting period, Canadian Forces conducted operations in Afghanistan as part of the International Security Assistance Force (ISAF). In its assigned area of operations, hostilities continued throughout the reporting period. Notwithstanding the increased risks associated with hostilities, the Canadian Forces have established Standard Operation Procedures (SOP)s that reflect the responsibility to track the use of munitions as well as the clearance or destruction of unexploded ordnance. As far as security conditions and operational taskings in the Canadian area of operations allow, the Canadian Forces continue to destroy Explosive Remnants of War (ERW).

Any other relevant information:

Canada recognizes the risk that ERW places upon local populations, whose protection is key to the success of the Canadian and ISAF mission. Removing explosive remnants of war that could pose an immediate risk to local populations is a critical piece of Canada's role in protecting the local population, and thus removing such ERW becomes an important consideration for the mission.

**FORM B:** Steps taken to implement Article 4 of the Protocol: Recording, retaining and transmission of information

---

High Contracting Party: CANADA

---

Reporting for time period from: 19/11/2009 to 31/12/2009  
[dd/mm/yyyy] [dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 4 and the Technical Annex:

Canadian Forces Standard Operating Procedures, in line with the ISAF procedures, necessitate the recording of all uses of explosive ordnance. Multiple records capture both the initial request and eventual use (including type and location) of the munitions. Separate situation reports provide a narrative of each incident and separately capture the use of explosive ordnance. Further, an entirely separate logistics system tracks the movement of ammunition before and as it is expended. Thus, records on the use and storage of explosive ordnance are maintained in Department of National Defence information systems. These systems are already established and integrated with Canadian Forces Standard Operating Procedures.

Any other relevant information:

Current Canadian Forces recording and reporting allows for the provisions of Article 4, specifically with regards to release of information to third parties, to be carried out upon the cessation of hostilities. In the meantime, this information is available as required to ISAF partners if national responsibility for territories in Afghanistan changes as part of the evolution of the ISAF mission.

**FORM C:** Steps taken to implement Article 5 of the Protocol: Other precautions for the protection of the civilian population, individual civilians and civilian objects from the risks and effects of explosive remnants of war

---

High Contracting  
Party:

CANADA

---

Reporting for time period from:

19/11/2009

to

31/12/2009

---

[dd/mm/yyyy]

[dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 5 and the Technical Annex:

The Canadian Forces implement control measures during operations to minimize any risk to the civilian population from ERW. These control measures can include physically separating the civilian population from areas where munitions covered under this protocol are to be deployed; education and/or notice to the local population in advance of the use of these munitions; and survey of the area after the use of these munitions in order to identify, mark and dispose of ERW.

Any other relevant information:

National Defence maintains a **Unexploded Explosive Ordnance (UXO) and Legacy Sites Program**. It consists of educating the public on the dangers of UXOs, and maintaining a national data base of legacy sites within Canada where UXOs may still remain due to military operations, training or weapons testing, as well as wartime action along Canada's coasts and incidents involving ships, planes or vehicles carrying ammunition and explosives. The information is available to the public through the following web site: <http://www.uxocanada.forces.gc.ca/index-eng.asp>. To help share this information, public information sessions are being held at many site-locations across Canada. Photographs taken at these sessions may also be accessed from this web site.

**FORM E:** Steps taken to implement Article 7 of the Protocol: Assistance with respect to existing explosive remnants of war

---

High Contracting  
Party:

CANADA

---

Reporting for time period from:

19/11/2009

to

31/12/2009

[dd/mm/yyyy]

[dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 7:

Within the ISAF mission, Canada has not generally sought assistance under the provisions of Article 7, as the extent of the ERW situation in the Canadian area of operations, and the ability to address ERW given the operational environment, has remained within the capability of Canadian Forces-commanded elements. As an ISAF partner, the Canadian Forces remains ready to provide assistance, in line with the provisions of Article 7, subject to the availability of suitable resources.

Any other relevant information:

**FORM F:** Steps taken to implement Article 8 of the Protocol: Co-operation and assistance

---

High Contracting  
Party:

CANADA

---

Reporting for time period from:

19/11/2009

to

31/12/2009

[dd/mm/yyyy]

[dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 8:

Canada provides assistance to High Contracting Parties in need through the Canadian International Development Agency (CIDA) bi-lateral programmes and through the Department of Foreign Affairs and International Trade (DFAIT) Global Peace and Security Fund. Current levels of support for this Protocol, the Ottawa Convention Banning Anti-Personnel Mines and the Convention on Cluster Munitions can be found in the Ottawa Convention Article 7 Report on the UN website ([www.unog.ch](http://www.unog.ch)).

Any other relevant information:

**FORM G:** Steps taken to implement Article 9 of the Protocol: Generic preventive measures

---

High Contracting  
Party:

Canada

Reporting for time period from:

19 /11/ 2009

to

31 /12/ 2009

[dd/mm/yyyy]

[dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 9 and the Technical Annex:

Canada has processes, procedures, orders and directives in place to deal with every aspect of the ammunition and explosives life cycle. These policy and procedures include but are not limited to: design, acquisition, transportation, storage (inventory management, security, stock rotations, and surveillance), use and disposal. Canada's regulations are based on and have been developed in conjunction with the NATO Group of Experts to ensure compliance and compatibility during training and operations. Canada has a robust training program in place for its military and civilian personnel for all aspects of the life cycle of ammunition and explosives. These procedures comply with Article 9.

Any other relevant information:

**FORM H:** Steps taken to implement Article 11 of the Protocol: Compliance

---

High Contracting  
Party:

Canada

---

Reporting for time period from:

19/11/2009

to

31/12/2009

[dd/mm/yyyy]

[dd/mm/yyyy]

---

Steps taken to implement the provisions of Article 11:

Canadian Forces began implementation of this new obligation by conducting an initial assessment of the impact that this protocol will have on its current doctrine, education, and training (including individual training, collective training, and professional development) so that adjustments can be made efficiently and effectively where needed in order to ensure full compliance with the spirit and letter of the protocol. Particular attention will be paid to operational procedures and the current Law of Armed Conflict training program to ensure compliance.
