Contracting Republic of reporting for time
Party Lithuania period from 01/01/2006 to 31/12/2006

Mine clearance programmes

As Lithuania is a mine free country no specific mine clearance programmes are required. However, there is a certain degree of contamination by explosive remnants of war. Engineering battalion of the Lithuanian Armed Forces is tasked to clear and destroy the explosives.

In 2006 Lithuania established an inter-institutional working group on solving issues of existing explosive remnants of war. This group has prepared a long-term Programme and Action Plan adopted by the Government on April 2007, that applies a systematic approach to solving the problem and takes into account the provisions of CCW Protocol V on gathering of information on contaminated territories, threat assessment, defining the priorities, marking or cleaning the territory, international cooperation, etc.

Rehabilitation programmes

As the territory of the Republic of Lithuania is not contaminated by anti-personnel mines and therefore there are no mine victims, specific rehabilitation programmes are not required.
