INFORMATION TO THE ARMED FORCES:

Canada’s obligations as a State party to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction (Ottawa Convention) include agreeing never under any circumstances to use, produce, acquire or transfer anti-personnel mines, except for the development of, and training in, mine detection, mine clearance or mine destruction techniques with ministerial authorization. Therefore, these obligations encompass and go beyond Canada’s obligations as a state party to Protocol II as Amended.

Following ratification of the Ottawa Convention, Canada’s Chief of the Defence Staff distributed a directive to senior officials in the Department of National Defence notifying them of prohibited activities and ordering that Canadian Armed Forces (CAF) personnel be fully informed of Canada's obligations under the Convention. The directive also highlighted the fact that when CAF personnel are participating in military activities with armed forces of States that are not Party to the Convention they are prohibited from providing assistance in the use of, or planning for the use of, anti-personnel mines.”

All CAF personnel are trained in the Law of Armed Conflict, during which members are instructed on CAF doctrine and manuals that explain Canada’s obligations under the Convention. Specific direction with respect to anti vehicle mines under Amended Protocol II was issued by the Commander of the Canadian Army in February 2016.

AMENDED PROTOCOL II

INFORMATION TO THE CIVILIAN POPULATION:

Canada's obligations as a State party to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction (Ottawa Convention) encompass and go beyond Canada's obligations as a state party to Protocol II as Amended.

The Government of Canada has actively promoted Canada's support for the Ottawa Convention through numerous public outreach efforts, the dissemination of numerous documents pertaining to the Ottawa Convention, the distribution of news releases to the media and providing information on the Global Affairs Canada website.

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

Several Canadian non-governmental organizations and companies have the means to undertake various aspects of mine clearance, including surveys, demining, mine detection dog operations, mine clearance training, mine action information systems and project management. In addition, several Canadian non-governmental organizations and companies possess or have developed technologies that are applicable to humanitarian mine clearance. Additionally, the Canadian Armed Forces maintain the capabilities to mitigate explosive remnants of war threats for both domestic and expeditionary operations.

LISTS OF EXPERTS AND EXPERT AGENCIES:

Information pertaining to Canadian mine action experts and expert agencies can be obtained through Canada's principal point of contact on all mine-related matters (see below).
