Form G Information to the UN-database on mine clearance

Article 11, paragraph 2,

"2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance."

Remark:

High Contracting Party: CZECH REPUBLIC

Reporting for time period
from: 01/04/2011 to: 31/03/2012

dd/mm/yyyy

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

The engineer units of the Armed Forces of the Czech Republic are equipped with the Midiflail mine clearance system BOZENA 5 (hereinafter referred as BOZENA). BOZENA is a tracked mechanical mine clearing machine remotely controlled by a transmitter with a range of 2000 m, meant for clearing AP mines both pressure and tripwire fused and for AT mines up to 9 kg of TNT charged. The system shall be suitable for clearing large mine affected areas. It will mainly be road transported on trailer between working areas.

BOZENA is protected from detonations by an armoured shield situated at the front of the vehicle, directly behind the flail. In addition, the whole machine is protected with an armoured metal covering, giving protection against damage from detonations.
