FORM A    Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

High Contracting Party: Australia

Reporting for time period from 01 January 2009 to 31 December 2009

Steps taken to implement the provisions of Article 3

As previously reported, the use of explosive ordnance by the Australian Defence Forces (ADF) has not resulted in Explosive Remnants of War (ERW). This is the case for both Unexploded Ordnance (UXO) and Abandoned Explosive Ordnance (AXO), irrespective of whether the area of operations is under Australia’s control.

The ADF have not created any ERW, as any UXO is dealt with expeditiously and is therefore not abandoned. This is because ADF policy is to pro-actively deal with ERW in theatres of operations even before active hostilities have formally ceased. This policy is aimed at mitigating the threat posed by UXO, by destroying items as they are found, rather than dealing with them after the close of active hostilities (as required by Article 3).

All UXO items found by the ADF on operations in 2009 were identified, documented and destroyed. Risk assessments of the threat posed by the ERW are an integral part of this process.

Any other relevant information
FORM B    Steps taken to implement Article 4 of the Protocol: Recording, retaining and transmission of information

High Contracting Party: Australia

Reporting for time period from 01 January 2009 to 31 December 2009

Steps taken to implement the provisions of Article 4 and the Technical Annex

The Australian Defence Force (ADF) tracks and records every use of explosive ordnance.

Detailed electronic reports, including Explosive Ordnance Disposal (EOD) databases, are maintained by all relevant commands and are populated with information from Australian military forces in the field. This information is then transmitted to ADF command headquarters in the theatre of operations, and back to Australia.

The ADF operational level headquarters in Australia maintains a comprehensive register that includes reporting of Explosive Remnants of War (ERW) incidents. These reports include: the nature, type, quantity and condition of the Unexploded Ordnance (UXO) or Abandoned Explosive Ordnance (AXO); any actions taken to mark, clear, remove and/or destroy these items; their location; and an assessment of the threat posed.

The register also provides detailed information about: reporting steps taken; any future action required to deal with the items; and any warnings issued or risk education provided to military forces or the local community.

Protective equipment, risk education, and information on ERW are also provided when visitors enter ADF areas of operations.

Any other relevant information
FORM C  Steps taken to implement Article 5 of the Protocol: Other precautions for the protection of the civilian population, individual civilians and civilian objects from the risks and effects of explosive remnants of war

High Contracting Party: Australia

Reporting for time period from 01 January 2009 to 31 December 2009

Steps taken to implement the provisions of Article 5 and the Technical Annex

The Australian Defence Force (ADF) exercises a duty of care to all local nationals within any area affected by Explosive Remnants of War (ERW). Warnings, cordonning, evacuation and other safeguards are implemented prior to any recovery or destruction of ERW.

In accordance with the Protocol, the ADF undertook all practicable precautions to protect the civilian population, individual civilians and civilian objects from the risks and effects of ERW in territory under their control.

Risk education is conducted by the ADF to warn local civilians of the dangers of ERW, and advise of reporting processes to enable civilians to report ERW when they are found.

Any other relevant information
FORM D  Steps taken to implement Article 6 of the Protocol: Provisions for the protection of humanitarian missions and organizations from the effects of explosive remnants of war.

High Contracting Party: Australia

Reporting for time period from 01 January 2009 to 31 December 2009.

Steps taken to implement the provisions of Article 6

In 2009, the Australian Defence Force (ADF) provided information to humanitarian missions and organisations on the location of Explosive Remnants of War (ERW) within the humanitarian missions’ and organisations’ area of operations. This was the case irrespective of whether the particular area of operations was under the control of the ADF.

Any other relevant information
FORM E  Steps taken to implement Article 7 of the Protocol: Assistance with respect to existing explosive remnants of war

High Contracting Party: Australia

Reporting for time period from 01 January 2009 to 31 December 2009.

Steps taken to implement the provisions of Article 7

In 2009, the Australian Defence Force (ADF) assisted other states’ forces in performing clearance, removal, and destruction of existing Explosive Remnants of War (ERW) from previous conflicts. For example, Operation RENDER SAFE provided assistance in dealing with existing ERW in the Solomon Islands.

For the 2009 reporting period, the ADF also offered Explosive Ordnance training courses to the Malaysian and Singaporean Armed Forces:

a. Demolition Operator training was provided to one Malaysian Officer; and
b. Explosive Ordnance Suppliers training was provided to two Malaysian non commissioned personnel.

**FORM F**  Steps taken to implement Article 8 of the Protocol: Co-operation and assistance

High Contracting Party: **Australia**

Reporting for time period from **1 January 2009** to **31 December 2009**.

**Steps taken to implement the provisions of Article 8**

The Australian Defence Force (ADF) exchanges information on a regular basis with the Defence establishments of Canada, New Zealand, United Kingdom and the United States as part of the Technical Co-operation Program (TTCP). In relation to Explosive Remnants of War (ERW) and the removal of ERW, this information concerns the capabilities of equipment, procedures employed, and results of tests, trials, exercises, and operations. This information allows the participating nations to increase their knowledge of the problems involved with the removal of ERW and improve relevant skills and techniques.

Mine action is an important element of Australia’s aid program. AusAID’s Mine Action Strategy committed $75 million for the period 2005 to 2010. In November 2009, Australia announced a new $100 million Mine Action Strategy for the Australian aid program over the five years from 2010-14. The goal of the strategy is to reduce the threat and socio-economic impact of landmines, cluster munitions and other explosive remnants of war. The intended outcomes are: improved quality of life for victims; reduced number of deaths and injuries; enhanced capacity of countries to manage their mine action programs; and effective leadership and advocacy by Australia on mine action. Australia will focus on assisting affected countries in the Asia-Pacific region, with flexibility to respond to other emerging needs and priorities such as Afghanistan. In 2009, Australia spent $24.5 million on mine action on de-mining, survivor assistance, mine risk education and advocacy activities. As a signatory to Protocol V, Australia’s mine action activities address the impact of both landmines and explosive remnants of war.

FORM G  Steps taken to implement Article 9 of the Protocol: Generic preventive measures

High Contracting Party: **Australia**

Reporting for time period from **01 January 2009 to 31 December 2009.**

Steps taken to implement the provisions of Article 9, the Technical Annex

The Australian Defence Force (ADF) maintains Standard Operating Procedures for dealing with Explosive Remnants of War (ERW) – such as marking, reporting, transporting, and storing ordnance. These procedures comply with Article 9.

The ADF has developed and implemented procedures to minimize the occurrence of ERW, and will continue to improve these procedures into the future. Current ADF procedures include, but are not limited to: training for all personnel in the Law of Armed Conflict; and training of specific personnel in Explosive Ordnance Disposal and standard operating procedures that reduce risk to personnel (including civilians) and the environment.

Defence compliance with the technical aspects of this Protocol is achieved through Technical Regulations. Technical Regulatory Authorities (TRA) are accountable to Service Chiefs and provide appropriate assurance through established regulatory frameworks and auditing compliance within those frameworks. The TRA provides technical integrity regulation through regular compliance audit, ongoing liaison and established steering groups and working groups.

The Explosive Ordnance Assurance Board (EOAB) provides the Vice Chief of the Defence Force with assurance of appropriate Explosive Ordnance (EO) safety management in Defence. The EOAB is Chaired by the Director General Explosive Ordnance (D GEO) in Joint Logistics Command, with Air Force taking the lead TRA role. The EOAB provides a key technical compliance assurance mechanism for introducing EO into Service, and for sustainment of in-Service EO. The EOAB is also responsible for reviewing ADF compliance with EO safety policy. During the 2009 reporting period, the Terms of Reference for the EOAB were reviewed, and the regularity of meetings increased.

The Defence Explosive Ordnance Committee continues as the senior advisory committee supporting the Commander Joint Logistics as the single point of accountability for the Defence-wide management of EO, reporting routinely to the Defence Capability Committee.

Defence, through the Defence Materiel Organisation, actively researches and seeks to employ methods to achieve the highest possible reliability and safety of EO, by engaging industry and research organizations to enhance the reliability, suitability and safety of munitions.

FORM H  Steps taken to implement Article 11 of the Protocol: Compliance

High Contracting Party: Australia

Reporting for time period from 01 January 2009 to 31 December 2009.

Steps taken to implement the provisions of Article 11

The Australian Defence Force (ADF) has issued instructions to operational commands, which comply with the Protocol.

For example, the ‘Standing Instructions LOG on Explosive Ordnance for Operation CATALYST (Iraq)’, dated 21 November 2007, requires among other things:

a. That the Explosive Ordnance (EO) management process follow current ADF orders and instructions with respect to security, licensed storage and operational life;

b. All ammunition technical staff to be conversant with ADF policy, orders and instructions as well as all current domestic EO management regulations for the storage, distribution, handling and maintenance of EO in the Middle East Area of Operations;

c. The Senior Ammunition Technical Representative to ensure that EO was stored, transported, managed and disposed of safely by Task Groups in accordance with current ADF legal and policy requirements; and

d. EO incidents, particularly malfunctions, were to be reported on occurrence.

Furthermore, specific Protocol V requirements and procedures for dealing with Explosive Remnants of War (ERW) are covered in pre-deployment and ongoing training. These instructions and procedures are reviewed constantly to ensure their continuing relevance and applicability to current Government direction, including compliance with Protocol V.
