AMENDED PROTOCOL II

Form A Dissemination of information

Article 13,
paragraph 4 (a)

“The High Contracting Parties shall provide annual reports to the
Depositary [...] on [...]:

(a) dissemination of information on this Protocol to their armed forces and
to the civilian population;”

Remark:

High Contracting Party:

THE REPUBLIC OF CROATIA

Reporting for time period

from: **01/01/2015**

dd/mm/yyyy

to: **31/12/2015**

dd/mm/yyyy

INFORMATION TO THE ARMED FORCES:

Since Croatia is one of the High Contracting Parties to the Convention on Cluster Munitions, that Convention is added to the curriculum of the Croatian Defence Academy. The introduction of the Convention on Cluster Munitions to the Croatian Armed Forces was used to reshape and expand the curriculum time dedicated at all levels of education on the agreements, treaties and conventions signed and ratified by Croatia. Starting at basic, advance and senior NCO courses it expands and gets more in-depth coverage all the way up to the War College level. The new expanded curriculum is being implemented from the beginning of September 2011 and is being updated all the time.

INFORMATION TO THE CIVILIAN POPULATION:

Dissemination of information about the CCW and its protocols to civilian population is performed through mine risk education (MRE) activities. Croatian Ministries, Offices of the Government and State Administrative Offices as well as NGOs and international organizations, pass specific training according to their role in the national implementation of the Convention and Protocols.

Croatian Red Cross with its local branches (in local communities), Croatian Mine Action Centre (CROMAC), Ministry of Interior and the Association of Civil Victims of Homeland War are active in events and lectures where MRE messages are given. These lectures always bear in mind that mine risk education is effective in terms of reducing the number of mine casualties. Interesting presentations (lectures) on mine/UXO risk education were organised for children, adults, and for specific target groups (hunters, farmers, firemen, mountaineers, fishermen, public companies employees etc.).

Promotion to the public and the media is an especially important way to directly spread safety messages about the dangers of ERW, which seeks to inform as many citizens at the local and national level. Creating and distributing posters, flyers, brochures, etc. and publishing news stories in print and electronic media (radio and TV spots) reaches a significantly larger number

AMENDED PROTOCOL II

of citizens, and further points to the still present danger of landmines in Croatia.

The Croatian Police Department is continuing its "Fewer arms, less tragedies" program in partnership with UNDP and Croatian Mine Action Centre. The citizens are being educated and encouraged to turn in their weapons and ordinance left from the Homeland War. The Croatian Police Department also reacts on basis of citizen's telephone calls and finds large quantities of weapons within their investigations of various criminal activities. Realizing the scope of the problem in Croatia, the Police Department is continuing this program in the future.

MINE CLEARANCE PROGRAMMES:

The Republic of Croatia confirmed its determination to solve the mine problem by passing the Law on Humanitarian Demining in 1996, establishing the Croatian Mine Action Centre in 1998, fulfilling the commitments undertaken by joining the Ottawa Convention as well as providing for permanent and stable sources of financing from the State Budget, the World Bank loans, EU funds and Croatian public companies.

In 2012, the Office for Mine Action was established by the Government of the Republic of Croatia ("Official Gazette", 21/12) as a governmental body for technical, analytical, advisory, co-ordinating and other activities related to mine action in Croatia. As such, it will also closely follow the activities and work with CROMAC. One of the main goals of the Office is to raise the awareness of population about the danger of mines, as well as to create conditions for effective development of mine action in Croatia.

CROMAC drafted the Humanitarian Demining Plan 2015 which was approved by the Ministry of Regional Development and the European Union Funds, the Ministry of Interior, Ministry of Defence, Ministry of Transport and Infrastructure, the Ministry of Environment and Nature, Ministry of Physical Planning and Construction, Ministry of Agriculture, Ministry of tourism and Ministry of finances along with all of the all mine contaminated Counties in the Republic of Croatia. Through 94 demining projects, mine threat has been removed from an area that amounts to 40.604.007m² while additional 27.153.434 m² was reduced through non-technical survey activities. All these activities resulted in the total decrease of the suspected hazardous area in Croatia in the amount of 67.757.441 m². According to that, suspected hazardous area in the Republic of Croatia on December 31, 2015 totalled 467,4 km².

In 2015 the largest share in demined area is area planned for different economic activities like forest area and especially agricultural land which the local and regional governments have stated as their priority crucial for start of agricultural production and the other activities. During the mine clearance activities total number of 4.801 mines and UXOs was found and destroyed, out of which, 3.093 mines and 1.708 UXOs.

AMENDED PROTOCOL II

At the start of 2015, 40 commercial companies with the total capacities of 650 deminers, 55 demining machines and 30 mine detection dogs conducted demining operations, while at the end of 2015 mentioned number increased to 46 accredited commercial companies with the total capacity of 653 deminers, 55 demining machines and 42 mine detection dogs.

The Annual Demining Plan was realized using the following funding sources - State Budget funds, legal entities and state administration bodies, EU funds and donations. It is important to mention that, for the first time ever, in 2015., funds acquired for the demining operations gathered from other sources surpassed the ones from the State budget which until 2015 accounted for more than 59% of the total funds spent for mine clearance operations from 1998 – 2014. In 2015. EU funds had the biggest financing share with 56% of total funds spent and contracted (State budget 38%, legal entities and state administration bodies 4%, donations 2%). Parallel with the implementation of the non-technical survey and search and demining operations, the control of marking and, if necessary, additional marking of suspected hazardous areas was conducted in order to create a clear boundary between safe and mine suspected areas. The locations of mine danger signs are one of the basic elements of the Mine Information System (MIS) that is shown on the maps given to the local authorities, police administration and individuals that have requested maps on MSA situation. On December 31, 2015 the total mine suspected area was marked with 13.274 mine danger signs, which means 1200 more mine danger signs in comparison to previous year.

Certain amount of Croatian military facilities including barracks, training areas, radar stations and storage sites are still partially contaminated by land mines, cluster munitions remnants and other UXO. The Demining battalion of the Engineering regiment is responsible for clearance of all military facilities. During 2015, an area of 343.584 m² was searched and cleared. 40 pieces of AP and 0 pieces of AV landmines were found during the process, while 69.720 pieces of UXO were discovered and destroyed.

Since the incident in the military storage site Pađene (near Knin on September 13, 2011), the Demining battalion of the Engineering regiment finished its clearance activities on 30th May 2015. All exploded and unexploded ordinances found are removed and destroyed.

The Croatian Police Department is continuing its "Fewer arms, less tragedies" Program in partnership with UNDP. The citizens are being educated and encouraged to turn in their weapons and ordinance left from the Homeland War. Among large arsenals of SALW and other weapons, during 2015 the Police Department collected 137 pieces of AP and 101 pieces of AV landmines.

REHABILITATION PROGRAMMES:

In line with the Law on Humanitarian Demining, mine risk education and mine victims assistance was conducted during this period with co-coordinative role of Government Office for Mine Action and CROMAC and co-operation with non-governmental organizations, different institutions and international organizations and associations.

Mine/UXO risk education

Different mine risk education activities, marking of mine suspected area, possibility of getting an insight into mine situation through submission of MSA maps and CDs as well as using [CROMAC web portal](#) have a positive effect on the prevention of mine incidents, but also require additional activities of informing the public and media with different mine action aspects.

In 2015, there were two mine incidents that resulted with casualties of three people, one fatal, and two with heavy injuries. Mentioned incidents have occurred during demining operations and all three victims were deminers.

In 2015, the Croatian Mine Action Centre coordinated a large number of activities related to informing about mine danger. Through 69 lectures and presentations, more than 8.500 citizens were educated in 2015. Majority of them were kindergarten and elementary school kids. Special

AMENDED PROTOCOL II

education was given to the members of Hunting associations, Croatian mountain rescue service, hikers, farmers and tourists.

The largest number of activities related to the education about dangers of mines and UXO were done in cooperation with the Ministry of Internal Affairs and the relevant police departments through the "Less arms, less tragedy" campaign. The cooperation was also achieved with: Croatian Hunting Federation, Croatian Red Cross, Lions Club Beli Manastir, Disability Volleyball Club Zagreb, county, city and municipal governments and other non-governmental organizations and associations.

All actions and activities in Mine Action in Croatia and worldwide were presented on web pages of CROMAC and Government Office for Mine Action.

Central ceremony for the April 4, International day of Mine Awareness and Assistance in Mine Action was held in Zagreb in co-organisation of Government Office for Mine Action and CROMAC.

Providing assistance to mine victims

The Republic of Croatia has developed public health care structure that includes clinics, clinical centres, specialized polyclinics, hospitals and rehabilitation centres. All persons being involved in the incidents are entitled to health protection and acquisition of orthopaedic aids to the amount covered by the Croatian Health Insurance Institute. These rights are regulated by a number of laws, rules and regulations. Relevant state administration authorities were involved in solving the problems of mine victims relating to medical rehabilitation. In accordance with the Law on Humanitarian Demining, mine victims assistance was conducted with CROMAC coordinative role and in co-operation with ministries, domestic and foreign organizations and NGOs. "Croatian action plan for victims of mines and unexploded ordnance 2010 - 2014" based on the commitments undertaken by signing the Ottawa Convention and the Convention on Cluster Munitions was put in place in 2010. The main goal of this plan is to improve the quality of life of people injured by mines and UXOs as well as their families. Competent government authorities dealt with problems of mine victims in the part of medical rehabilitation. Other forms of aid were mainly implemented by non-governmental sector, and funding was secured through donations from international and domestic entities.

Most importantly, CROMAC continued to provide advisory support to mine victims and their families and to collect data on mine victims and their needs during the process of non-technical survey in continuation of the 2014. project conducted by Government Office for Mine Action and CROMAC with a goal of establishing unique Mine Victim Database.

Individual assistance

The Republic of Croatia has highly developed legal framework relating to the persons with disabilities in realizing their legitimate rights and status. The status and various forms of rights are being realized through over 200 different laws and by-laws. There are 4 basic forms of mine victim assistance in which ministries, institutions, non-governmental sector, a number of organizations and individual initiatives take part in, such as medical care, physical rehabilitation, psychological help and social reintegration and professional and economic rehabilitation.

There are 29 specialized hospitals for physical rehabilitation in Croatia and one Institute for rehabilitation and orthopedic aids in Zagreb. Centers for psychosocial help and assistance in all 20 counties of the Republic of Croatia and City of Zagreb were opened, aiming at providing the assistance to all people with disabilities including mine victims with war traumas including mine victims and members of their families.

Additional payment for better quality prostheses in the amount of 7.000 to 50.000 HRK is the

AMENDED PROTOCOL II

most frequent form of individual support. Several dozens of persons ask for such type of support each year.

Collective programs of rehabilitation and reintegration

Distribution of brochure issued in 2011 "Options and rights for persons with disabilities - people affected by mines" has continued in 2015.

NGO "Mine Aid" continued supporting mine victims through several projects. During 2015, the advisory assistance to persons affected by mines, and their families continued to be provided by Mine Aid. In the organization of the Sitting Volleyball Club "Zagreb" and in cooperation with the Sitting Volleyball Club "Šibenik", CROMAC, Mine Aid Association and the Foundation "Croatia without Mines" on 27 June 2015 in the town square Poljana in Drniš municipality, the campaign "Together for Croatia without mines" was presented. At the beginning of the program the performance "Mine Free World - Security - Happiness" was delivered during which demining process was presented. In the second part of the program the players of the volleyball clubs from Zagreb, Šibenik, Knin and Zadar showed a sitting volleyball game - a sport that can be practiced by people injured by mines. Furthermore, during the program, the educational materials on mine threat that still exists in the Republic of Croatia were distributed to the visitors.

CROMAC continued to provide advisory support to mine victims and their families and to collect data on mine victims and their needs during the process of non-technical survey.

AMENDED PROTOCOL II

Form E International technical information exchange, cooperation on mine clearance, technical cooperation and assistance

Article 13,
paragraph 4 (e)

“The High Contracting Parties shall provide annual reports to the Depository [...] on [...]:
(e) measures taken on international technical information exchange, on international cooperation on mine clearance, and on technical cooperation and assistance;”

Remark:

High Contracting Party: **THE REPUBLIC OF CROATIA**

Reporting for time period

from: 01/01/2015 to: 31/12/2015
dd/mm/yyyy dd/mm/yyyy

INTERNATIONAL TECHNICAL INFORMATION EXCHANGE:

Based on the Agreement on the transfer of tasks, Article 2, signed between the Croatian Mine Action Centre and CROMAC - Center for Testing, Development and Training (CROMAC-CTDT) on 30 October 2003, CROMAC-CTDT took over the activities and projects focused on testing of mine detection and mine clearance equipment, as well as research of new methods and technology.

Technical cooperation:

CROMAC-CTDT is one of 26 partners from 11 countries in the TIRAMISU project (Toolbox Implementation for Removal of Anti-personnel Mines, Sub munitions and UXO) financed by the European Commission. The project started in 2012 and will end in 2015. The project is coordinated by the Royal Military Academy in Brussels, and the goal is to provide a global toolbox that will cover the main Mine Action activities, from the survey of large areas to the actual disposal of explosive hazards, and mine risk education.

In September, 2015, at SEDEE-DOVO, Belgian military training centre, a presentation was held of the tools developed as part of the TIRAMISU Project, financed in the framework of the 7th Framework Programme of the European Union. CROMAC-CTDT presented results of the company on the following tasks: coordination of operative validation of the tools in cooperation with CROMAC, development of the method of training honeybees for detection of minefields, hyperspectral non-technical and technical surveys, and the method of non-technical survey of the area after an explosion of an ammunition depot. The demonstration was attended by representatives of the European Union, Belgian army, countries of the project partners, as well as of the scientific community, led by the Belgian princes Astrid, Special Envoy of the Ottawa Convention. As part of the Project TIRAMISU – Implementation of Tools for Removal of Mines, Submunitions and Unexploded Ordnance, financed by the European Commission within the FP7 Programme, on 22nd and 23rd October CROMAC-CTDT conducted validation of a

AMENDED PROTOCOL II

computer game developed by the partners from the Institute of Mathematical Machines from Warsaw, Poland. The purpose of the game was to educate children on dangers of mines. The validation was conducted in two elementary schools. The target group were the pupils in grades 5-8, and the aim was to establish usefulness and applicability of the game in mine risk education for the purpose of using it, with specific adjustments, all over the world.

Training:

One of the main fields of expertise of CROMAC-CTDT is training. Training courses are conducted in accordance with IMAS and CWA agreements. In 2013, the following training courses were conducted for international partners:

- In Zagreb, from 15 June to 3 July 2015, training for EOD level 1 was held. The training was financed by the Ministry of Foreign and European Affairs of the program of development assistance. The aim of the course was the professional training of students for tasks of locating, identifying, and supervised destruction of UXO on the spot.
- On two occasions, from March 29 to April 9 and 18 to 25 October 2015 CROMAC-CTDT implemented the project of training among Syrian refugees in the refugee camp Mafraq in Jordan on the topic of ERW risk, with a goal to train new instructors that will, when they return to their country, pass the knowledge among local people. At the end of this project, financed by the Croatian Ministry of foreign affairs, 80 new instructors, men and women, have been trained in total.
- The project entitled "Mine action after floods - regional synergies, the development of technology and capacity building", which was launched in 2014, continued in 2015. The project was approved and funded by the Croatian Ministry of Foreign Affairs as a part of the cooperation development, with CROMAC as the project leader. The project is implemented in cooperation with BH MAC and the MAC of the Republic of Serbia, and among other things includes the Air Force reconnaissance of the areas affected by floods, landslides and floods, combined with the investigations on the ground, in order to obtain information about possible new mine hazardous areas as a result of potential mine movement caused by natural disasters. In addition, one of the goals of the project is to develop the capacity of partner countries in the project for quick action in the event of similar disasters, acquisition of scouting drones and training of their operators.
- The Workshop "Accreditation, Contracting and Monitoring for Mine Action Agencies" was held in December 2015. The organizers were Croatian Mine Action Centre (CROMAC), Centre for Testing, Development and Training (CROMAC-CTDT) and Geneva International Centre for Humanitarian Demining (GICHD). The Workshop was held for 14 participants coming from the Arabic-speaking countries: Libya, Mauritania, Lebanon, Palestine, Saudi Arabia, Sudan and Somalia.

Croatian Mine Action Centre, CROMAC-CTDT and Government Office for Mine Action were the co-organizers of the 12th International Symposium and Equipment Exhibition "MINE ACTION 2015" which was held in the City of Biograd in April 2015. The Symposium became the global umbrella gathering in terms of mine action problematic and has been visited by more and more people every year. Around 160 participants from 32 countries attended the Symposium during which different plenary sessions, a field demonstration, workshops and working meetings of IARP, TIRAMISU and RACVIAC were held.

AMENDED PROTOCOL II

INTERNATIONAL COOPERATION ON MINE CLEARANCE:

The international cooperation on mine clearance of the Republic of Croatia during the above mentioned period was performed thanks to the donors' contributions from different countries, organizations and individuals. European Union, US and Monaco financed humanitarian demining activities in Croatia in 2015.

TECHNICAL COOPERATION AND ASSISTANCE:

Cooperation on international level required close cooperation between CROMAC and Croatian Ministry of Foreign and European Affairs, Croatian diplomatic missions throughout the world and Croatian Ministry of Defense. Apart from fulfilment of the commitments undertaken by Croatia signing the Ottawa Treaty, international cooperation activities have mostly consisted of raising demining funds, capacity building, mine victims assistance and mine risk education. International cooperation also included taking part in different conferences at regional and international level that enabled us to promote and present achievements of Croatian mine action system.

The establishment of Cluster for Humanitarian Demining Ltd. created opportunity for the export of Croatian know-how to foreign markets or/in to countries that have a mine problem. Cluster, through its founders and its associated members, in one place ensures the capacity, resources and knowledge to carry-out all activities related to mine action. As the knowledge, technologies and products greatly surpassed the needs of Croatia, the intention is to offer the same knowledge and resources to countries with mine problem for its faster removal. The main objective of this association is to improve efficiency through a variety of advanced economic processes: changing and improving methodology, components, machines, services and through adaptation and access to new regions, and all for the purpose of establishing a mine action as Croatian export product. Cluster now comprises of 14 members, except for CROMAC and CROMAC-CTDT, there are the manufacturers of demining machines DOK-ING Ltd., Đuro Đaković Special Vehicles Inc. and demining company Istraživač Ltd., manufacturers of protective equipment Borovo Gumitrade Ltd. and Šestan-Busch Ltd., a manufacturer of metal detectors Vallon GmbH from Germany and manufacturer of magnetic locators Schonstedt Instrument Company from US, Regional Center for Underwater Demining (RCUD) from Montenegro, Blas-tip Ltd. from Slovenia, demining companies MKA*Deming Ltd. and Mungos razminiranje Ltd. as well as Geofoto Ltd.

AMENDED PROTOCOL II

Form G Information to the UN-database on mine clearance

Article 11,
paragraph 2,

“2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance.”

Remark:

High Contracting Party: **THE REPUBLIC OF CROATIA**

Reporting for time period

from: **01/01/2015**

dd/mm/yyyy

to: **31/12/2015**

dd/mm/yyyy

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

Mine clearance capacities included a complete equipment of 46 commercial demining companies that are authorized by Croatian Ministry of Interior to perform mine clearance activities. They also need to have accreditation from CROMAC to perform such actions.

All the employees that work in mine clearance (653) are wearing protective equipment that consists of flack jacket with protection for groins and helmets with visors. For special cases of UXO demolition, companies use ballistic suits. Following equipment is in usage for humanitarian demining activities: 705 metal detectors, 55 demining machines including all types (medium, light and heavy), excavators, machines for vegetation clearing and 42 mine detection dogs.

In Croatia, mine clearance actions are mostly performed as a combination of mechanical demining, manual detection and mine-searching dogs. CROMAC Standard Operating Procedures (SOPs) also prescribe the entire methodology of humanitarian demining activities. Frequent use of demining machines puts Croatia among the leading states with industrial mine clearance.

LISTS OF EXPERTS AND EXPERT AGENCIES:

Mine clearance experts are employed in various institutions, which deal with mine action issues
CROMAC :

- Dražen Jakopec – Director,
- Tomislav Ban – operative planning and programming
- Miljenko Vahtarić –international cooperation and education
- Neven Karas – general and financial affairs
- Heads of CROMAC Regional offices (Josip Čerina, Dubravko Krušarovski) – operational performance

CROMAC-CTDT Ltd. conducts testing and certification of mine detection and mine clearance equipment; research and development of new mine detection and mine clearance methods and technology; and training in the field of mine action.

Cluster for Humanitarian Demining Ltd. integrates experience and capacities of CROMAC,

AMENDED PROTOCOL II

CROMAC - CTDT, commercial demining companies and equipment manufacturers, thus resulting in uniting of all demining subjects in the Republic of Croatia and opening the door for export of Croatian know-how and technologies to foreign markets i.e. countries facing the mine problem.

During 2015. there were 49 commercial companies that were authorized by the Ministry of the Interior and competed in public tenders for mine clearance projects:
