☐ NO

☐ Partially, only the following forms:

| A | B | C | D | E | F | G | H | I |
FORM A: Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

High Contracting Party: Republic of Moldova

Reporting for time period from: 01/01/2019 to 31/12/2019

Steps taken to implement the provisions of Article 3:

During the reported period, the demining teams of the National Army removed and destroyed 7,700 rounds of assorted Second World War ERWs.

Any other relevant information:

According to the Article 3 of the Protocol the Explosive Remnants of War (ERW) found on the territory of the Republic of Moldova result from the First and Second World Wars, as well as some dumping from the former Soviet military bases. They existed before the entry into force of the Protocol. Therefore, all steps taken by the National Army with regard to clearance, removal or destruction of ERW should be regarded as voluntary measures, which do not result from any obligation under the Protocol.

The National Army of the Republic of Moldova is responsible for clearance, removal and the destruction of the ERW explosives found on the territory of the Republic of Moldova.

The National Army operates in regard to the Protocol V only on the controlled territory, and this does not include the Transdnestrian region of the Republic of Moldova.

With the assistance of the Organisation for Security and Cooperation in Europe and the European Union Border Assistance Mission in Moldova, the National Army had delineated the border between the Republic of Moldova and Ukraine and determined the ERW sensitive zones, as with high risk (Anenii Noi, Causeni, Stefan-Voda, Ungheni districts), medium risk (Chisinau, Ialoveni, Hincesti, Nisporeni, Calarasi, Straseni districts) and moderate risk (rest of the districts in the North and South of the Republic of Moldova).

The National Army has established the following procedures upon ERW clearance:

When the ERW is found the following measures are taken:

• The Local Administration is the first to take actions: - secure the area around the found ERW, - inform the Local Military Centre - the National Army;
• The National Army will dispatch the Demining team to the spot:
  - destroy the ERW on the spot if possible, if not:
  - move the ERW to a secure, specialized area and destroy it,
  - ensure that there are no other ERWs in the area and in close proximity to it.
• The Local Military Centres twice a year are conducting instructive lectures with the local Administration and local population on how to react and what are the prompt measures to be taken when a ERW is found.
