**Steps taken to implement the provisions of Article 9 and the Technical Annex:**

Pursuant to conclusions and recommendations of the Eighth Conference of the High Contracting Parties to Protocol V which took place from 10 to 11 November 2014 Slovakia can provide information to the following questions:

Who in your country armed forces is responsible for management of munitions site? Does this responsibility change during an armed conflict?

For the management of munition sites in peace time and also during an armed conflict is responsible the Office of logistician support of the Slovak Armed Forces.

What are standard operating procedures under which your munitions are managed? Are these procedures in accordance with the International Ammunition Technical Guidelines?

The management of munition is regulated by Act No. 58/2014 - Law about explosives, explosive ordnance and munitions. This document deals also with management of munitions sites. The procedures in munitions sites are controlled by military regulations Del-28-2, Del-27-4, Žen-23-1 and Let-24-27.

What measures are taken to maintain munitions storage areas? Are the munitions sites regularly checked? And if so, how often are the sites checked?

For cleaning of rooms is responsible the munition site manager. The safety operator annually checks the building condition, fire safety (e.g. lighting roads). Any requirement regarding building maintenance is dealing through the Ministry of Defence.

The munitions sites are guarded and they are checked according to regulations daily. The manager of munitions site checks munitions sites regularly according to military regulations (weekly, monthly, etc.)

What records are kept of those who enter such sites?

Every enter to munitions site is recorded - first name, last name, ID No., number of visited building with munitions, purpose of entrance, time of arrival and time of departure.

What records are maintained on the numbers and types of munitions stored?

The manager of munitions site (building with munitions) is responsible to record every expenditure and reception of munitions according to military regulation Vsevojsk-17-5/s - military material number, category of item, name of item, serial number, year of production, code country of origin.

How often are the munitions inspected? What procedures are in place to identify and remove degraded munitions?

The munitions are inspected according to the Ministry of Defence Directive - six months before expiration of its guarantee period or periodic examination. The periodic examination is specified every five or two years (it depends on category of item).

In case of any disaster, the munitions present on the place of disaster (in munitions sites, at the training, etc.) should be inspected no later than one year after the incident

Has your country received outside expert assistance or advice on munitions safety in storage and transportation?

Slovakia hasn't received outside assistance or advice.
