## AMENDED PROTOCOL II

### Form A                      Dissemination of information

---

Article 13,  
paragraph 4 (a)

“The High Contracting Parties shall provide annual reports to the  
Depositary [...] on [...]:

(a) dissemination of information on this Protocol to their armed forces and  
to the civilian population;”

*Remark:*

High Contracting Party:

**THE REPUBLIC OF CROATIA**

Reporting for time period

from: **01/01/2012**

dd/mm/yyyy

to: **31/12/2012**

dd/mm/yyyy

#### **INFORMATION TO THE ARMED FORCES:**

Since Croatia is one of the High Contracting Parties to the Convention on Cluster Munitions, that Convention is added to the curriculum of the Croatian Defence Academy. The introduction of the Convention on Cluster Munitions to the Croatian Armed Forces was used to reshape and expand the curriculum time dedicated at all levels of education on the agreements, treaties and conventions signed and ratified by Croatia. Starting at basic, advance and senior NCO courses it expands and gets more in-depth coverage all the way up to the War College level. The new expanded curriculum is being implemented from the beginning of September 2011.

#### **INFORMATION TO THE CIVILIAN POPULATION:**

Dissemination of information about the CCW and its protocols to civilian population is performed through mine risk education (MRE) activities. Croatian Ministries, Offices of the Government and State Administrative Offices as well as NGOs and international organizations, pass specific training according to their role in the national implementation of the Convention and Protocols.

Croatian Red Cross with its local branches (in local communities), Croatian Mine Action Centre (CROMAC) and the Association of Civil Victims of Homeland War are active in events and lectures where MRE messages are given. These lectures always bear in mind that mine risk education is effective in terms of reducing the number of mine casualties. Interesting presentations (lectures) on mine/UXO risk education were organised for children, adults, and for specific target groups (hunters, fishermen, public companies employees etc.).

Promotion to the public and the media is an especially important way to directly spread safety messages about the dangers of ERW, which seeks to inform as many citizens at the local and national level. Creating and distributing posters, flyers, brochures, etc. and publishing news stories in print and electronic media (radio and TV spots) reaches a significantly larger number of citizens, and further points to the still present danger of landmines in Croatia.

## **AMENDED PROTOCOL II**

The Croatian Police Department is continuing its "Fewer arms, less tragedies" program in partnership with UNDP. The citizens are being educated and encouraged to turn in their weapons and ordinance left from the Homeland War. The Croatian Police Department also reacts on basis of citizen's telephone calls and finds large quantities of weapons within their investigations of various criminal activities. In this program the Croatian Police Department collected 3255 Hand Grenades, big amount of SALW and other weapons and lots of different ammunition. Realizing the scope of the problem in Croatia, the Police Department is continuing this program in the future.

## AMENDED PROTOCOL II

### **Form B**                      **Mine clearance and rehabilitation programmes**

---

Article 13,  
paragraph 4 (b)                      “The High Contracting Parties shall provide annual reports to the  
Depository [...] on [...]:

(b) mine clearance and rehabilitation programmes;”

*Remark:*

dd/mm/yyyy

to:

31/12/2012

dd/mm/yyyy

#### **MINE CLEARANCE PROGRAMMES:**

The Republic of Croatia confirmed its determination to solve the mine problem by passing the Law on Humanitarian Demining in 1996, establishing the Croatian Mine Action Centre in 1998, fulfilling the commitments undertaken by joining the Ottawa Convention as well as providing for permanent and stable sources of financing from the State Budget, the World Bank loans and Croatian public companies.

In 2012, the Office for Mine Action was established by the Government of the Republic of Croatia ("Official Gazette", 21/12) as a governmental body for technical, analytical, advisory, co-ordinating and other activities related to mine action in Croatia. As such, it will also closely follow the activities and work with CROMAC. One of the main goals of the Office is to raise the awareness of population about the danger of mines, as well as to create conditions for effective development of mine action in Croatia.

CROMAC drafted the Humanitarian Demining Plan 2012 which was approved by Croatian Government. Through 271 demining projects, mine threat has been removed from an area that amounts to 30.491.455 m<sup>2</sup> while additional 36.787.326 m<sup>2</sup> was reduced through general survey activities. All these activities resulted in the total decrease of the suspected hazardous area in Croatia in the amount of 67.278.781 m<sup>2</sup>. By December 31, 2012 CROMAC has also updated areas contaminated only with UXOs in the size of 7.1 km<sup>2</sup> and they are marked with 383 UXO hazard signs. According to that, suspected hazardous area in the Republic of Croatia on December 31, 2012 totalled 685.5 km<sup>2</sup>.

In 2012 the largest share in demined area with a share of 64% are agricultural lands which the local and regional governments have stated as their priorities crucial for start of agricultural production. Of the total contracted demining operations in 2012, 35% refers to the priorities related to safety, 57% related to socio-economic development, and 7% on the environmental priorities. During the mine clearance activities total number of 8.852 mines and UXOs was found and destroyed, out of which, 4.481 mines and 4.371 UXOs.

In 2012, 33 commercial companies with the total capacities of 636 deminers, 53 demining

## AMENDED PROTOCOL II

machines and 16 mine detection dogs conducted demining operations.

The Annual Demining Plan was realized using the following funding sources - State Budget funds, legal entities and state administration bodies, EU funds and donations. The State Budget had the biggest financing share with 61.2% of total funds spent and contracted (legal entities and state administration bodies 25.5%, EU funds 8.4%, donations 4.8%). From the establishment of CROMAC until December 31, 2012 a total of 527 million EUR has been invested in demining operations (from all sources). State Budget accounts for 58% of the total funds for mine clearance operations from 1998 - 2012.

Parallel with the implementation of the general survey and search and demining operations, the control of marking and, if necessary, additional marking of suspected hazardous areas was conducted in order to create a clear boundary between safe and mine suspected areas. The locations of mine danger signs are one of the basic elements of the Mine Information System (MIS) that is shown on the maps given to the local authorities, police administration and individuals that have requested maps on MSA situation. On December 31, 2012 the total mine suspected area was marked with 13.899 mine danger signs.

Certain amount of the Croatian military facilities including barracks, air bases, training areas, radar stations and storage sites are still partially contaminated by land mines, cluster munitions remnants and other UXOs. The Demining battalion of the Engineering regiment is responsible for clearance of all military facilities. During 2012, an area of 91.758 m<sup>2</sup> was searched and cleared. 4 AP and 4 AV landmines were found during the process, while 7.539 pieces of UXOs were discovered and destroyed. Additionally, Demining battalion did technical surveillance and other methods of treatment on surface of 7.083.275 m<sup>2</sup>.

On September 13, 2011 a local fire engulfed the military storage site Pađene (near Knin) and triggered several explosions. As a result, an area of 5 km radius was contaminated with exploded and unexploded remnants of cluster munitions, grenades and other ordinance. Since the incident, Deming battalion searched and cleared an area of 13.5 km<sup>2</sup>. All exploded and unexploded ordinances found were removed and destroyed. There were no casualties due to this incident. Clearance activities are continuing and will be finished during 2013.

The Croatian Police Department is continuing its "Fewer arms, less tragedies" program in partnership with UNDP. The citizens are being educated and encouraged to turn in their weapons and ordinance left from the Homeland War. Among large arsenals of SALW and other weapons, during 2012 the Police Department collected 283 AP and 95 AV landmines.

### **REHABILITATION PROGRAMMES:**

In line with the Law on Humanitarian Demining, mine risk education and mine victims assistance was conducted during this period with co-coordinative role of CROMAC and co-operation with non-governmental organizations, different institutions and international organizations and associations.

#### **Mine/UXO risk education**

Different mine risk education activities, marking of mine suspected area, possibility of getting an insight into mine situation through submission of MSA maps and CDs as well as using [CROMAC web portal](#) have a positive effect on the prevention of mine incidents, but also require additional activities of informing the public and media with different mine action aspects.

In 2012 there were 3 mine incidents with 3 victims (2 deminers). Two persons were killed (deminer and civilian) and 1 person received light physical injuries (deminer). In

2012, annual rate of mine victims dropped with regard to 2011 (from 6 mine victims to 3). In 2012, CROMAC coordinated activities related to informing about mine danger. The Association of Croatian Civil Victims of War of the Republic of Croatia, Croatian Red Cross, CROMAC and the Ministry of Interior organized nine panels named "Children in Mine Environment" in

## AMENDED PROTOCOL II

elementary schools all over the country. Employees of CROMAC, throughout the year, participated in Radio Zagreb broadcast program presenting the most current content and information related to mine action.

All actions in education and other activities related to mine danger could be monitored on CROMAC's website which is updated daily. Such practice will continue in the future. In 2012 CROMAC, at the request of government bodies, regional and local governments, public enterprises, as well as Croatian citizens, issued a 398 insight and/or maps of the mine suspected areas. In addition to cartographic representations and insight, CROMAC has developed a unique web application MIS portal, available to all internet users, where it is possible to see the locations of mine suspected areas. "Croatia without Mines" – Trust Fund for Humanitarian Demining of Croatia has launched a project entitled "Education and information of the agricultural population of the danger of landmines". CROMAC actively participated in this project in 2012 through 39 panels in 10 counties.

Croatian Red Cross has continued with the programme about the mine danger in collaboration with 14 County Prefects and 49 local Red Cross branches, all located in the vicinity of mine suspected areas. Daska Theatre played 6 shows, "No, no MI-NE" in the counties in which there are mine suspected areas. That completes the project funded by the US Government through the ITF which started in 2010. In total, 67 shows were played. In 2012 there was also traditional media campaign "April - month of mine protection" on TV and radio stations and numerous other media related activities with the aim of MRE.

### **Providing assistance to mine victims**

The Republic of Croatia has developed public health care structure that includes clinics, clinical centres, specialized polyclinics, hospitals and rehabilitation centres. All persons being involved in the incidents are entitled to health protection and acquisition of orthopaedic aids to the amount covered by the Croatian Health Insurance Institute. These rights are regulated by a number of laws, rules and regulations. Relevant state administration authorities were involved in solving the problems of mine victims relating to medical rehabilitation. In accordance with the Law on Humanitarian Demining, mine victims assistance was conducted with CROMAC coordinative role and in co-operation with ministries, domestic and foreign organizations and NGOs. "Croatian action plan for victims of mines and unexploded ordnance 2010 - 2014" based on the commitments undertaken by signing the Ottawa Convention and the Convention on Cluster Munitions was put in place in 2010. The main goal of this plan is to improve the quality of life of people injured by mines and UXOs as well as their families. Competent government authorities dealt with problems of mine victims in the part of medical rehabilitation. Other forms of aid were mainly implemented by non-governmental sector, and funding was secured through donations from international and domestic entities.

### **Individual assistance**

The Republic of Croatia has highly developed legal framework relating to the persons with disabilities in realizing their legitimate rights and status. The status and various forms of rights are being realized through over 200 different laws and by-laws. There are 4 basic forms of mine victim assistance in which ministries, institutions, non-governmental sector, a number of organizations and individual initiatives take part in, such as medical care, physical rehabilitation, psychological help and social reintegration and professional and economic rehabilitation.

There are 29 specialized hospitals for physical rehabilitation in Croatia and one Institute for rehabilitation and orthopedic aids in Zagreb. Centers for psychosocial help and assistance in all 20 counties of the Republic of Croatia and City of Zagreb were opened, aiming at providing the assistance to all people with disabilities including mine victims with war traumas including mine

## AMENDED PROTOCOL II

victims and members of their families.

Additional payment for better quality prostheses in the amount of 7.000 to 50.000 HRK is the most frequent form of individual support. Several dozens of persons ask for such type of support each year.

### **Collective programs of rehabilitation and reintegration**

Distribution of brochure issued in 2011 "Options and rights for persons with disabilities - people affected by mines" has continued in 2012.

In May 2012, NGO "MineAid" organized a two-day seminar in the Town of Petrinja, which was a final event of project "Empowerment – Synergy – Integration", which was financed by the Ministry of Health and Welfare, and subsequently by the Ministry of Social Policy and Youth. The project was aimed at people affected by mines, and family members of casualties or dead, who, during the war and after the war suffered from mines with consequences such as amputation, internal organs injuries, loss of family members, and long-term psychological trauma, as well as persons suffering from multiple sclerosis and their families. During 2012, the advisory assistance to persons affected by mines, and their families continued to be provided by MineAid.

## AMENDED PROTOCOL II

### Form E International technical information exchange, cooperation on mine clearance, technical cooperation and assistance

---

Article 13,  
paragraph 4 (e)

“The High Contracting Parties shall provide annual reports to the Depository [...] on [...]:  
(e) measures taken on international technical information exchange, on international cooperation on mine clearance, and on technical cooperation and assistance;”

*Remark:*

High Contracting Party: **THE REPUBLIC OF CROATIA**

---

Reporting for time period

from: **01/01/2012**  
dd/mm/yyyy

to: **31/12/2012**  
dd/mm/yyyy

#### **INTERNATIONAL TECHNICAL INFORMATION EXCHANGE:**

Based on the Agreement on the transfer of tasks, Article 2, signed between the Croatian Mine Action Centre and CROMAC - Center for Testing, Development and Training (CROMAC-CTDT) on 30 October 2003, CROMAC-CTDT took over the activities and projects focused on testing of mine detection and mine clearance equipment, as well as research of new methods and technology.

#### **Technical cooperation:**

In January 2012, a research and development project TIRAMISU (Toolbox Implementation for Removal of Anti-personnel Mines, Submunitions and UXOs) started, where CROMAC - CTDT is one of 26 partners from 11 countries. The project is coordinated by the Royal Military Academy in Brussels, and the goal is to provide a global toolbox that will cover the main Mine Action activities, from the survey of large areas to the actual disposal of explosive hazards, and mine risk education. The project is funded by the European Union within the 7<sup>th</sup> Framework Program (FP7). The goal of CROMAC - CTDT is to conduct chemical and hyper-spectral analysis of vegetation inside minefields; to apply GIS for multi-criteria analysis tools; to conduct a trial of honeybees in detection and quality control; and to implement validation of tools developed by other partners. The project will last for four years.

As part of the project, multi-sensor airborne survey of Pađene military depot, where an explosion took place in 2011, was conducted in June 2012, as well as the measuring of spectral characteristics of explosive ordnance around it, taken from the ground.

#### **Training:**

In 2012 CROMAC - CTDT conducted three training courses for the staff of Russian Company “ITC for Special Works and Expertise”. The subject of the training courses was humanitarian demining - demining of UXO contaminated areas, and the trainees were worksite managers, team leaders and internal controllers. The first training course was conducted in May, the second one in August, and the third one in November.

As part of cooperation between the Republic of Croatia and the Republic of Iraq, three mine

## AMENDED PROTOCOL II

action training courses were held in 2012, for representatives of Iraqi Ministries of Ecology, of Defense and of Internal Affairs.

In March the training course was held on the topic of overall mine action system, where testing of demining machines and mine detection dogs was presented, as well as demining with machines and dogs.

In May a training course was held on the topic of use of machines in humanitarian demining.

In September a training course was held on the topic of manual demining.

In September, CROMAC - CTD T hosted a delegation from Central Asia and Afghanistan. Their visit was arranged with the OSCE Office in Tajikistan and ITF, and was financed by the OSCE Office in Tajikistan and the Republic of Korea. The delegation consisted of representatives of the MoD from Turkmenistan, Kirgizstan, Kazakhstan and Tajikistan; representatives of the Mine Action Centre from Afghanistan; representatives of the Government and UNDP of Tajikistan and the OSCE Office in Tajikistan.

For the part of the delegation from Tajikistan, lectures were organized with CROMAC on the mine action system in the Republic of Croatia; on planning, data bases and QA and QC. The rest of the delegation had lectures on storing and destruction of ammunition.

In 2012, two EOD training courses were held for the region of Southeast Europe, financed by the US State Department through ITF - in May an EOD Level 3 training course was held for trainees from Croatia, Serbia and Macedonia. In September an EOD Level 4 training course was held for trainees from Croatia, Bosnia and Herzegovina, Macedonia and Serbia.

In April, CROMAC - CTD T organized the 9<sup>th</sup> *International Symposium on Humanitarian Demining 2012* together with CROMAC. The following events were held on the margins of the Symposium: a Southeast Europe Mine Action Coordination Council (SEEMACC) Meeting; International Advanced Robotics Program - IARP HUDEM 2012 Workshop; and TIRAMISU Project meetings.

### **INTERNATIONAL COOPERATION ON MINE CLEARANCE:**

The international cooperation on mine clearance of the Republic of Croatia during the above mentioned period was performed thanks to the donors' contributions from different countries, organizations and individuals. European Union, US, Germany, Japan and Monaco financed humanitarian demining activities in Croatia in 2012.

### **TECHNICAL COOPERATION AND ASSISTANCE:**

Cooperation on international level required close cooperation between CROMAC and Croatian Ministry of Foreign and European Affairs, Croatian diplomatic missions throughout the world and Croatian Ministry of Defense. Apart from fulfilment of the commitments undertaken by Croatia signing the Ottawa Treaty, international cooperation activities have mostly consisted of raising demining funds, capacity building, mine victims assistance and mine risk education. International cooperation also included taking part in different conferences at regional and international level that enabled us to promote and present achievements of Croatian mine action system.

The establishment of Cluster for Humanitarian Demining Ltd. created opportunity for the export of Croatian know-how to foreign markets or/in to countries that have a mine problem. [Cluster](#), through its founders and its associated members, in one place ensures the capacity, resources and knowledge to carry-out all activities related to mine action. As the knowledge, technologies and products greatly surpassed the needs of Croatia, the intention is to offer the same knowledge and resources to countries with mine problem for its faster removal. The main objective of this association is to improve efficiency through a variety of advanced economic processes: changing

## AMENDED PROTOCOL II

and improving methodology, components, machines, services and through adaptation and access to new regions, and all for the purpose of establishing a mine action as Croatian export product. Cluster now comprises of 14 members, except for CROMAC and CROMAC-CTDT, there are the manufacturers of demining machines DOK-ING Ltd., Đuro Đaković Special Vehicles Inc. and demining company Istraživač Ltd., manufacturers of protective equipment Borovo Gumitrade Ltd. and Šestan-Busch Ltd., a manufacturer of metal detectors Vallon GmbH from Germany and manufacturer of magnetic locators Schonstedt Instrument Company from US, Regional Center for Underwater Demining (RCUD) from Montenegro, Blas-tip Ltd. from Slovenia, demining companies MKA\*Deming Ltd. and Mungos razminiranje Ltd. as well as Geofoto Ltd.

## AMENDED PROTOCOL II

### Form G Information to the UN-database on mine clearance

Article 11,  
paragraph 2,

“2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance.”

*Remark:*

High Contracting Party: **THE REPUBLIC OF CROATIA**

Reporting for time period

from: **01/01/2012**

to: **31/12/2012**

dd/mm/yyyy

dd/mm/yyyy

#### **MEANS AND TECHNOLOGIES OF MINE CLEARANCE:**

Mine clearance capacities included a complete equipment of 33 commercial demining companies that are authorized by Croatian Ministry of Interior to perform mine clearance activities. They also need to have accreditation from CROMAC to perform such actions.

All the employees that work in mine clearance are wearing protective equipment that consists of flack jacket with protection for groins and helmets with visors. For special cases of UXO demolition, companies use ballistic suits. Following equipment is in usage for humanitarian demining activities: 636 metal detectors, 53 demining machines including all types (medium, light and heavy), excavators, machines for vegetation clearing and 16 mine detection dogs.

In Croatia, mine clearance actions are mostly performed as a combination of mechanical demining, manual detection and mine-searching dogs. CROMAC Standard Operating Procedures (SOPs) also prescribe the entire methodology of humanitarian demining activities. Frequent use of demining machines puts Croatia among the leading states with industrial mine clearance.

#### **LISTS OF EXPERTS AND EXPERT AGENCIES:**

Mine clearance experts are employed in various institutions, which deal with mine action issues

##### **CROMAC :**

- Dražen Jakopec – Director,
- Mirko Ivanušić – Deputy Director
- Nikola Gambiroža – standardization, standard operating procedures, Demining Machines Evaluation Committee
- Tomislav Ban – quality assurance and quality control
- Davor Laura – general survey, making of projects, mine situation database
- Miljenko Vahtarić – finances and international cooperation
- Neven Karas – legislative issues
- Heads of CROMAC Regional offices (Damir Stojković, Josip Čerina, Dubravko Krušarovski) – operational performance

**CROMAC-CTDT Ltd.** conducts testing and certification of mine detection and mine clearance equipment; research and development of new mine detection and mine clearance methods and

## AMENDED PROTOCOL II

technology; and training in the field of mine action.

**Cluster for Humanitarian Demining Ltd.** integrates experience and capacities of CROMAC, CROMAC - CTD, commercial demining companies and equipment manufacturers, thus resulting in uniting of all demining subjects in the Republic of Croatia and opening the door for export of Croatian know-how and technologies to foreign markets i.e. countries facing the mine problem.

There are 33 commercial companies that are authorized by the Ministry of the Interior and they regularly apply for public tenders for mine clearance projects:
