MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

The engineer units of the Armed Forces of the Czech Republic are equipped with the Midi-flail mine clearance system BOZENA 5 (hereinafter referred as BOZENA).

BOZENA is a tracked mechanical mine clearing machine remotely controlled by a transmitter with a range of 2,000 m, meant for clearing anti-personnel mines both pressure and tripwire fused and for anti-tank mines up to 9 kg of TNT charged. The system is suitable for clearing large mine affected areas. It can be road transported on trailer between working areas.

BOZENA is protected from detonations by an armoured shield situated at the front of the vehicle, directly behind the flail. In addition, the whole machine is protected with an armoured metal covering, giving protection against damage from detonations.
