The minefields in the vicinity of the following communities: Cocieri, Chitcani, Copanca, installed by the military factions in 1992 during the Transdniestrian conflict, except that near the community Pohrebea, had been cleared. Afterwards, during the period of 04 May – 09 August of 2000, the mined area near the community Pohrebea was also cleared by the engineer units of the National Army. At the same time, annually, the National Army is conducting de-mining/UXO response missions on the territory of the Republic of Moldova (except the transdnestrian region), over the found mines and unexploded ordnance (UXO) from the World War II period. The Central part of the Republic of Moldova could be defined as high (Anenii Noi, Causeni, Stefan-Voda, Ungheni districts) and medium (Chisinau, Ialoveni, Hincesti, Nisporeni, Calarasi, Straseni districts) risk, whereas the north and south parts are at minor WW II UXO risk.

### REHABILITATION PROGRAMMES:

At present, no rehabilitation programmes are conducted.
