NATO Trust Fund project on EOD clearance and EOD capability development in Georgia (Georgia IV)	NATO Support Agency	2014	10 000 Eur

National efforts to reduce ERW contamination

As Lithuania is a mine free country no specific mine clearance programmes are required. However, there is a certain degree of contamination by explosive remnants of war (ERW) resulted from the First and the Second World Wars as well as pollution of former Soviet military bases. Engineering battalion of the Lithuanian Armed Forces is tasked to clear and destroy the explosives.

Lithuania started marking and ERW clearance activities in summer 2008.

In 2014 Lithuanian Armed Forces EOD company checked and cleaned over 229.29 ha of polluted territories and found 341 pieces of different explosive ordnance (anti-vehicle and anti-personnel mines, mortar, shells, grenades, cluster munitions, aviation bombs, ammunition etc.). From 2008 till the end of 2014 Lithuanian Armed Forces EOD company checked and cleaned over 481.29 ha of polluted territories and found over 11 641 pieces of different explosive ordnance.
