FORM A: Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012

Steps taken to implement the provisions of Article 3:

Combat engineers and EOD personnel involved in mining and demining activities are educated and trained in all matters in accordance STANAG 2389 (Minimum standards of proficiency for trained explosive ordnance disposal personnel). During Clearance operations, IMAS standards are applied. For major operations, EOD teams are foreseen on a systematic basis. All personnel of the Belgian Service for removal and destruction of explosive devices (EOD/IEDD - Improvised Explosive Device Disposal) is NATO certified and qualified. Belgian teams are actually operational in Afghanistan and Lebanon.

Any other relevant information:
FORM B: Steps taken to implement Article 4 of the Protocol: Recording, retaining and transmission of information

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012

Steps taken to implement the provisions of Article 4 and the Technical Annex:

Already before the entry into force of the Protocol V for Belgium, procedures existed within the Belgian Armed Forces for recording and retaining of information as foreseen in Article 4. There’s a two-fold recording and retaining information:
- operational: each unit engaged in operations has to mention in its reports all use of explosive munitions and, if applicable, all abandon of munitions. If possible, the information reported will be in conformity with the criteria of the Technical Annexe of the Protocol. These reports are in conformity with the international standards on mine action.
- logistical: all use of munitions during operations is recorded and reported.

Both records are integrated at the Operations Center of the Armed Forces. The crosscutting of both records allows a clear picture of the use of munitions, of the places of their use as of the zones where possible Explosive Remnants of War would be situated.

Similar procedures exist for multinational operations. The recording and retaining of information is submitted via the foreseen operational and logistic chains to the Operational Headquarters responsible for the operations. The Armed Forces are actually considering the possibility for implementing the electronic template.

Any other relevant information:

In 2012, the Defense Staff has issued particular directives to the military commanders (at all levels) in operations to ensure the full implementation of Article 4:

- ACOT-SPS-OPSJOIN-PSR-001 / PLJE from 11 October 2012 which regulates the implementation of Prot V by the Operations Division. This document gives clear directives for the recording, retaining and transmission of information about use of ammunition during operations at Staff level.
- ACOT-SPS-SOPOPS-PSRC-001 / PLJE from 11 October 2012 are the Standing Operating Procedures (SOP OPS) for commanders in the field with directives for the recording of information and the transmission to the higher Staff. It also contains a template for the recording of the information as described in Art 4.
- All necessary directives are also recalled in the CHOD (Chief of Defence) OPORDER (operation order) for the operations in which Belgian military are involved.
FORM C: Steps taken to implement Article 5 of the Protocol: Other precautions for the protection of the civilian population, individual civilians and civilian objects from the risks and effects of explosive remnants of war

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012

[dd/mm/yyyy] [dd/mm/yyyy]

Steps taken to implement the provisions of Article 5 and the Technical Annex:

The civilian population is taken into account at every step of the planning and execution process of the mission. Keeping in mind that the first responsibility to inform the civilian population and to prevent it from running at risk remains in the hands of the civilian authorities, Belgian Defense will transmit as much possible information to the local authorities on identified contaminated areas. Most of the time, the Belgian detachment will transmit the information to the local “Mine Action Center”, if deployed.

In some occasions, a “Mine Risk Education Program” in favor of the local population (children) and distribution of educational flyers is conducted by the Belgian detachment (e.g. in Lebanon).

In extreme situations and in request by local authorities, Belgian Defense will support local authorities, when feasible, to restore the basic services to the civilian population: major access routes, etc.

Practical directives:
- Ammunition will be stored according to the procedures;
- No unused ammunition will be left on the field;
- Unexploded ordnance will be reported, where feasible;
- When the situation requires it, an EOD detachment will take part to the mission. One of their missions is to destroy unexploded ordnance, when possible.

Any other relevant information:
CONVENTION ON CERTAIN CONVENTIONAL WEAPONS

FORM D: Steps taken to implement Article 6 of the Protocol: Provisions for the protection of humanitarian missions and organizations from the effects of explosive remnants of war

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012
[dd/mm/yyyy] [dd/mm/yyyy]

Steps taken to implement the provisions of Article 6:

Belgian Defense will inform, when possible, humanitarian organizations on the risks related with hazardous areas and the necessity to coordinate the movements with the local “Mine Action Center”, if deployed. The deployed Belgian Detachment will keep an updated map of the identified contaminated areas of its area of responsibility.

Practical directives: see Form C

Any other relevant information:

A special template to report ERW areas to external Defense actors is under writing.
**FORM E:** Steps taken to implement Article 7 of the Protocol: Assistance with respect to existing explosive remnants of war

High Contracting Party: **BELGIUM**

Reporting for time period from: 01/01/2012 to 31/12/2012

**Steps taken to implement the provisions of Article 7:**

-- Since May 2004, Belgium participates in the European Research Grouping Arrangement n°2 of the European Co-operation for Ammunition Destruction, with France, Luxembourg, the United-Kingdom and Germany.

- Since 2003 a handbook on EOD technical information was produced, translated in KHMER and handed over to the CMAC (Cambodia). Belgium guarantees technical information support on request.

- Since 2006 Belgian Defence participates in the Swedish Armed Forces owned EOD IS (Explosive Ordnance Disposal Information System). The data of this information system is also accessible for other States under condition of a bilateral agreement.

- Belgium regularly sends one or two demining skilled personnel to meetings related to Humanitarian Mine Action organized under the umbrella of NATO working group EOD, GICHD Review Board for IMAS, EDA working group, and assumes a liaison role between those organizations.

- Since 2003, Belgium organises an EOD course in French and in English to train team leaders of other countries. It should be stressed that one course in each language is organised every year and that there are only a limited number of places available.

- Since September 2006, Belgium contributes to UNIFIL with an Engineer/EOD capability. More than 13,000 UXO (mainly cluster munitions) have been cleared since then.

**Any other relevant information:**
FORM F: Steps taken to implement Article 8 of the Protocol: Co-operation and assistance

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012

Steps taken to implement the provisions of Article 8:

1. Introduction:
The projects listed here are based on financial contributions and the provisions of services. Note that the Belgian military experts working for SEDEE (Service for removal and destruction of explosive devices) have NATO diplomas and qualifications:
- EOD (Explosive Ordnance Disposal)
- IEDD (Improvised Explosive Device Disposal)
The staff is qualified in mine clearance and in the handling of UXO.

2. Projects:

A. Africa:
Angola: In 2011 Belgium decided to support humanitarian demining in Angola by the NGO APOPO with a contribution of 1.081.000 EURO for the period 2011-2013.

Somaliland: the project "Humanitarian Mineclearance in Northern Somaliland" by HALO TRUST received a contribution of 10.000 EURO in 2012.

B. Europe:
Kosovo: In 2011 Belgium decided to support humanitarian demining in Kosovo by the NGO Halo Trust with a contribution of 750.528 EURO for the period 2011-2013.

C. Middle East:
Lebanon: in the framework of the UNIFIL Mission-South, Belgium has a demining capacity available composed of:
- 1 demining platoon. This platoon is composed of 35 persons.
- 1 Liaison Officer in NAQOURA in support of the UNIFIL-staff.
This personnel rotates every four months.

Gaza-strip: the project "Mine Action Residual Response Capacity in the Gaza Strip" by UNMAS received 250.000 EURO in 2012.

Iraq: The project "Humanitarian Mine Action Northern & Central Iraq" by the Mine Advisory Group received a contribution of 10.000 EURO in 2012.

Jordan: the project "Jordan Valley Sampling and Verification Project" received a tranche of 100.000 EURO in 2012.

D. Asia:
Cambodia: Since 2003 a complete handbook on EOD technical information was produced, translated in KHMER and handed over to the CMAC (Cambodia), Belgium guarantees technical information support on request.

Philippines: the project "furthering the anti-personnel mine ban in the Philippines through the engagement of armed
Afghanistan: also in 2012 Belgium deployed 6 EOD operators to the provincial Reconstruction Team (PRT) of
uz. Since october 2012, this capacity is reorganized in ONE EOD Team (3 EOD/IEDD operators and 3 EOR) and one
(Explosive Detection DOg - 2 Dogs and 2 handlers). The team redeployed from KUNDUZ to MAZAR E SHARIF.

E. Latin America

Ecuador and Peru: Landmine victim assistance project by the Organisation of American States: 60.000 EURO in 2012.

Any other relevant information:

3. Research and Development:

Research and development activities are conducted as well at the national as the international level.

a. National level:
- The PARADIS project (a prototype for assisting rational activities in humanitarian de-mining using images from
sites http://www.sic.rma.ac.be/Projects/Paradis/) started in 1998. Initially, this project was funded by the Belgian federal
d for scientific, Technical and Cultural Affairs and the Belgian Ministry of Defense, and conducted by the Royal Military
emy (RMA) with - in the beginning - the participation of the department of Geography (IGEAT) of the Free university of
els (ULB). This prototype is highlighting very interesting solutions for the management of humanitarian de-mining
ations using satellite images, maps, context information and the IMSMA database and involves key actors including end-
image analysts and scientists. Now this Project is only funded by the Belgian Ministry of Defense. Since 2004, it is in a
of optimizing the developed solutions and to this end has undergone different tests:
- in October 2005: with the help of NGO APOPO, tests have been performed in Mozambique in order to analyze the
ility to integrate the needs of APOPO in the system;
- since November 2005 : trials have been conducted in Afghanistan by the Belgian EOD-team in close (internet)
oration with the SIC laboratory of the RMA;
- in June 2006, further validation tests for some modules have taken place in Belgium in collaboration with EOD
nel.
- in 2007, the PARADIS system has been finalized and presented to the end-users at SEDEE-DOVO. Presentations
targeting different levels of users (field officers, planners).

b. International level:
- The Royal Military Academy (RMA) is supporting the International Test and Evaluation Program (ITEP) by its
iation to the executive Committee and to the different working groups, as well as by financing the ITEP secretariat.
1st September 2004, the ITEP secretariat (http://www.itep.ws) is installed in the premises of the Royal Military
emy in Brussels, Belgium. The Memorandum of Understanding on the ITEP has come to an end in July 2010 without
sion. Possible follow-on scenarios are under study.
- The RMA is chairing the CEN (Centre Européen de Normalisation) initiative to define a new standard on the soil
eterisation for electromagnetic mine detection sensors. This project is funded by the European Commission and will last
ears. The personnel costs are funded by the Belgian Defence in the scope of the BEMAT project (see above).
- The University of Brussels (VUB) is involved in the STREAM project (http://stream.etro.vub.ac.be/home.html),
d by the European Commission, on the development of (1) products, and (2) procedures for end-to-end technological
ms and tools for survey and decision support in humanitarian crisis: humanitarian demining and locations of refugee
ents. This project started in 2005 and will last 4 years.
- Two Belgian deminers and a scientist from the Royal Military Academy participated in the tests of the dual sensor
tors organized by Germany under ITEP umbrella (Oberjettenberg, 21 Sep 2009 – 16 Oct 2009).

Within the 7th Framework Programme of the European Commission a consortium of 26 European and Japanese
ers co-ordinated by Prof. Yvan BAUDOIN prepares a series of cost-effective tools integrated in a comprehensive
ar toolbox for helping the clearing of larger areas affected by anti-personal landmines, cluster munitions, explosive
uts of war (ERW) and unexploded ordnance (UXO) and a related operational implementation of services, including
ardization actions
Beside its management role, the Royal Military Academy, in particular:
Define the Toolbox requirements and serve as Liaison Officer with an international Project advisory Board including
or stake-holders (UNMAS, GICHD, a.o.) ;

FORM G: Steps taken to implement Article 9 of the Protocol: Generic preventive measures

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012

Steps taken to implement the provisions of Article 9 and the Technical Annex:

1. Munitions Manufacturing Management:
   a. Munitions are no longer manufactured by Belgian Defense. However during the procurement process the administration requests (by means of indispensible specifications in the request for tender) that the manufacturers comply with the production principles mentionned in article 9.

   b. The National (Defense) QAR (or NATO homologues) personel is controlling the production process and the quality plan of the manufacturer.

   c. Safety & suitability for service is checked during evaluation (or proof is requested and evidence has to be provided in the offer). Once the contract is awarded, supplementary acceptance testing of pilot and serial lots are conducted following the specifications of the ammunition. Depending on the case those tests are conducted in the company and/or in Belgian Defense test facilities.

   d. Ammunition is acquired only when not in conflict with international law & treaties signed/ratified by BELGIUM.

2. Munition Management during the whole "Life Cycle":
   a. "In Service Surveillance" is conducted in a pragmatic way.

   Modular Structure:
   ISM - In Service Monitoring: Tech visual Inspections , user findings, findings during renovation/maintenance
   ISP - In Service Proof: Life Firing/functional testing
   CM - Condition Monitoring: Chemical Analyses of energetic material, Radiographic/radioscopic investigation, dimensional control,…
   PT - Predictive testing: pre-stress a test item before examination, in order to provide a prediction of residual life
   EDL - Environmental Data Logging:collecting data of endured Vibrations, Humidity, Temperature & Shocks.

   b. Operational deployment:
   - Ammunition is suffering severe stress (temperature, humidity, vibrations) when deployed on a theatre of operations. When the degradation is detected (by the user or by Ammunition technical personel) a Technical degrading Report (TDR) is sent to the Material Manager who will decide what to do. In order to be able to detect degradation, the ammunition deployed on theatres of operations is accompanied with EDL (Environmental Data Loggers). The Data received is cross-checked with manufacturers data

   There are several options:
   * Urgent demilitarization by EOD services when storage and/or transport safety is no longer guaranteed.
   * Use in priority for training on theatre.
   * Evacuation to Belgium where this part of the lot is isolated and considered as a "fleetleader" for further In Service Surveillance.
   * Possible demolition on theatre by Belgian EOD personnel or those from NATO partners when transport to Belgium is not economically justifiable.
c. Phasing out:
- Ammunition that is not longer used, because of unacceptable technical degradation or because the weapon system is not longer used, stays in inventory until demilitarized.
- Demilitarization: 3 options
  * Urgent demilitarization by EOD services when storage safety is no longer guaranteed.
  * Demilitarization in Belgian Demilitarization Installations
  * Outsourcing of demilitarization contracts through NSPA (NATO Support Agency)

- The storage safety (safe to handle) is guaranteed for as long the ammunition stays in inventory.

d. Best practices and operating procedures in the domain of storage, transport, field storage and safe handling.

Belgian Defense has ratified and implemented the following NATO AGREEMENTS and complies with the European legislation in the domain of Safe storage and transportation of ammunition and explosives:

STORAGE:
- AASTP-1 (ALLIED AMMUNITION STORAGE AND TRANSPORT PUBLICATION 1)
  (MANUAL OF NATO SAFETY PRINCIPLES FOR THE STORAGE OF MILITARY AMMUNITION AND EXPLOSIVES)
- AASTP-5 (Manual of NATO Safety Principles for the Operational Storage of Military Ammunition and Explosives)

TRANSPORT:
- AASTP-2 MANUAL OF NATO SAFETY PRINCIPLES FOR THE TRANSPORT OF MILITARY AMMUNITION AND EXPLOSIVES
- ADR, IMDG, IATA &RID for the transportation of dangerous goods

FORM H: Steps taken to implement Article 11 of the Protocol: Compliance

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2012 to 31/12/2012

Steps taken to implement the provisions of Article 11:

Officers assigned as “Advisers in the Law of Armed Conflict” are available in each unit (up to battalion or independent company level) to advise military commanders on the application of the Law of Armed Conflict. The education programme of these advisers includes a general information about the Protocol V obligations.

Any other relevant information:
