

Genève, le 28 mars 2013

Secrétariat de la Convention sur Certaines Armes Conventionnelles
Bureau des Affaires de Désarmement
Service de Genève
Bureau C 113 - 1
Palais des Nations
GENEVE
- PROTOCOL V -

REPORTING FORMS
PURSUANT TO ARTICLE 10, PARAGRAPH 2 (b) OF THE PROTOCOL AND THE
DECISION OF THE FIRST CONFERENCE OF THE HIGH CONTRACTING
PARTIES TO PROTOCOL V

(As adopted by the First Conference at its second plenary meeting on 5 November 2007)

HIGH CONTRACTING PARTY: BELGIUM

NATIONAL POINT(S) OF CONTACT (Organization, telephones, fax, e-mail):

Marie-France ANDRE
Federal Public Service Foreign Affairs, Foreign Trade and Development Cooperation - BELGIUM
Direction M5 - Disarmament, Non-Proliferation and Arms Control
Service M5.1 Human Security and conventional disarmament

tel +32 2 501 88 87
fax +32 2 501 38 22
marie-france.andre@diplom.fed.be

DATE OF SUBMISSION: 31/03/2014
(dd/mm/yyyy)

This information can be available to other interested parties and relevant organizations

☑ YES

☐ NO

☐ Partially, only the following forms:

A ☐ B ☑ C ☐ D ☐ E ☐ F ☐ G ☐ H ☐ I ☐

CONVENTION ON CERTAIN CONVENTIONAL WEAPONS
FORM A: Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2013 to 31/12/2013

Steps taken to implement the provisions of Article 3:

Combat engineers and EOD personnel involved in mining and demining activities are educated and trained in all matters in accordance with STANAG 2389 (Minimum standards of proficiency for trained explosive ordnance disposal personnel). During Clearance operations, IMAS standards are applied. For major operations, EOD teams are foreseen on a systematic basis. All personnel of the Belgian Service for removal and destruction of explosive devices is NATO certified and qualified (EOD/IEDD - Improvised Explosive Device Disposal). Belgian teams are actually operational in Afghanistan and Lebanon.

Any other relevant information:

CONVENTION ON CERTAIN CONVENTIONAL WEAPONS
FORM B: Steps taken to implement Article 4 of the Protocol: Recording, retaining and transmission of information

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2013 to 31/12/2013 [dd/mm/yyyy]

Steps taken to implement the provisions of Article 4 and the Technical Annex:

Already before the entry into force of the Protocol V for Belgium, procedures existed within the Belgian Armed Forces for recording and retaining of information as foreseen in Article 4.

There’s a two-fold recording and retaining information:
- Operational: each unit engaged in operations has to mention in its reports all use of explosive munitions and, if applicable, all abandon of munitions. If possible, the information reported will be in conformity with the criteria of the Technical Annex to the Protocol. These reports are in conformity with the international standards on mine action.
- Logistical: all use of munitions during operations is recorded and reported.

Both records are integrated at the Operations Center of the Armed Forces. The crosscutting of both records allows a clear picture of the use of munitions, of the places of their use as of the zones where possible Explosive Remnants of War would be situated.

Similar procedures exist for multinational operations. The recording and retaining of information is submitted via the foreseen operational and logistic chains to the Operational Headquarters responsible for the operations.

In 2012, the Defense Staff has issued particular directives to the military commanders (at all levels) in operations to assure the full implementation of Article 4:

- ACOT-SPS-OPJOIN-PSR-001 / PLJE from 11 October 2012 which regulates the implementation of Prot V by the Operations Division. This document gives clear directives for the recording, retaining and transmission of information about the use of ammunition during operations at Staff level.

- ACOT-SPS-SOPOPS-PSRC-001 / PLJE from 11 October 2012 are the Standing Operating Procedures (SOP OPS 3.7.3) for commanders in the field with directives for the recording of information and the transmission to the higher Staff level. It also contains a template for the recording of the information as described in Art 4.

- All necessary directives are also recalled in the CHOD (Chief of Defence) OORDER (operation order) for the operations in which Belgian military are involved.

Any other relevant information:

CONVENTION ON CERTAIN CONVENTIONAL WEAPONS
FORM C: Steps taken to implement Article 5 of the Protocol: Other precautions for the protection of the civilian population, individual civilians and civilian objects from the risks and effects of explosive remnants of war

High Contracting Party: BELGIUM

Report for time period from: 01/01/2013 to 31/12/2013

Steps taken to implement the provisions of Article 5 and the Technical Annex:
The civilian population is taken into account at every step of the planning and execution process of the mission. Keeping in mind that the first responsibility to inform the civilian population and to prevent it from running at risk remains in the hands of the civilian authorities, Belgian Defense will transmit as much possible information to the local authorities on identified contaminated areas. Most of the time, the Belgian detachment will transmit the information to the local "Mine Action Center", if deployed. In some occasions, a "Mine Risk Education Program" in favor of the local population (children) and distribution of educational flyers is conducted by the Belgian detachment (e.g. in Lebanon). In extreme situations and in request by local authorities, Belgian Defense will support local authorities, when feasible, to restore the basic services to the civilian population: major access routes, etc.

Practical directives:
- Ammunition will be stored according to the procedures;
- No unused ammunition will be left on the field;
- Unexploded ordnance will be reported, where feasible;
- When the situation requires it, an EOD detachment will take part to the mission. One of their missions is to destroy unexploded ordnance, when possible.

Any other relevant information:
FORM D: Steps taken to implement Article 6 of the Protocol: Provisions for the protection of humanitarian missions and organizations from the effects of explosive remnants of war

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2013 to 31/12/2013

Steps taken to implement the provisions of Article 6:

Belgian Defense will inform, when possible, humanitarian organizations on the risks related with hazardous areas and the necessity to coordinate the movements with the local “Mine Action Center”, if deployed. The deployed Belgian Detachment will keep an updated map of the identified contaminated areas of its area of responsibility.

Practical directives: see Form C

Any other relevant information:

A special template to report ERW areas to external Defense actors is under writing.
FORM E: Steps taken to implement Article 7 of the Protocol: Assistance with respect to existing explosive remnants of war

<table>

<tbody>
<tr>
<td>Reporting for time period from:</td>
<td>01/01/2013 to 31/12/2013</td>
</tr>
</tbody>
</table>

Steps taken to implement the provisions of Article 7:

- Since May 2004, Belgium participates in the European Research Grouping Arrangement n°2 of the European Co-operation for Ammunition Destruction, with France, Luxembourg, the United-Kingdom and Germany.
- Since 2003 a handbook on EOD technical information was produced, translated in KHMER and handed over to the CMAC (Cambodia). Belgium guarantees technical information support on request.
- Since 2006 Belgian Defence participates in the Swedish Armed Forces owned EOD IS (Explosive Ordnance Disposal Information System). The data of this information system is also accessible for other States under condition of a bilateral agreement.
- Belgium regularly sends one or two demining skilled personnel to meetings related to Humanitarian Mine Action organized under the umbrella of NATO working group EOD, GICHD Review Board for IMAS, EDA working group, and assumes a liaison role between those organizations.
- From 2003 till 2010, Belgium organised EOD courses in French and English to train team leaders of other countries. Courses are now ad hoc organised based on requests.
- Since September 2006, Belgium contributes to UNIFIL with an Engineer/EOD capability. More than 13,000 UXO (mines included but mainly cluster munitions) have been cleared since then.

Any other relevant information:

CONVENTION ON CERTAIN CONVENTIONAL WEAPONS
FORM F: Steps taken to implement Article 8 of the Protocol: Co-operation and assistance

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2013 to 31/12/2013

Steps taken to implement the provisions of Article 8:

1. Introduction:

The projects listed here are based on financial contributions and the provisions of services. Note that the Belgian military experts working for SEDEE (Service for removal and destruction of explosive devices) have NATO certifications and qualifications:
- EOD (Explosive Ordnance Disposal)
- IEDD (Improvised Explosive Device Disposal)
The staff is qualified in mine clearance and in the handling of UXO.

2. Projects:

A. Africa:

1. Congo Brazzaville. In 2013 Belgian Defence deployed ONE team to Congo Brazzaville in order to support the training of personnel in the aftermath of the ammunition depot explosion. Main purpose was to train ammunition safeguarding, stockpile management and consequence management.

2. Mozambique

2013: 290,000 euros to APOPO
Contribution Type: monetary
Activity Type: Humanitarian Mine clearance

3. Angola

2013: 450,000 euros to APOPO
Contribution Type: monetary
Activity Type: Humanitarian Mine clearance

4. RDC

2013: 22,013 euros to UNV-UNMACC
Contribution Type: monetary
Activity Type: mine risk education

B. Europe:

1. Kosovo

2013: 50,528 euros to Halo Trust
Contribution Type: monetary
Activity Type: humanitarian mine clearance

2. Lithuania: In 2013 Belgium participated with a mine clearing vessel in the Historical Ordnance Clearance operation (OPEN SPIRIT'2013) in the coastal waters of Lithuania.

C. Middle East:

1. Lebanon: in the framework of the UNIFIL Mission-South, Belgium has a demining capacity available composed of:

CONVENTION ON CERTAIN CONVENTIONAL WEAPONS
- PROTOCOL V -

- 1 demining platoon. This platoon is composed of 35 persons.
- 1 Liaison Officer in NAQOURA in support of the UNIFIL-staff. This personnel rotates every four months.

2-Jordan
2013: 96,890 euros to NCDR
Contribution Type: monetary
Activity Type: Mine clearance - Jordan Valley sampling and verification project

3- Gaza Strip
2013: 250,000 euros to UNMAS
Contribution Type: monetary
Activity Type: humanitarian mine clearance

D. Asia:

1-Cambodia: Since 2003 a complete handbook on EOD technical information was produced, translated in KHMER and handed over to the CMAC (Cambodia), Belgium guarantees technical information support on request.

2-AFGHANISTAN
2013: 250,000 euros to Halo Trust
Contribution Type: monetary
Activity Type: humanitarian mine clearance

3-Afghanistan: Belgium deploys ONE EOD/IEDD team in MAZAR E SHARIF in support of ISAF.

4-Philippines
2013: 9,273 euros to Geneva Call
Contribution Type: monetary
Activity Type: furthering the anti-personnel mine ban in the Philippines through the engagement of armed non state actors

5-Cambodia
2013: 250,000 euros to Halo Trust
Contribution Type: monetary
Activity Type: humanitarian mine clearance

E. Latin America

1- Colombia
2013: 140,000 euros to Handicap International
Contribution Type: monetary
Activity Type: Victim Assistance

2-Equator and Peru
2013: 60,000 euros to Organization of American States
Contribution Type: monetary
Activity Type: humanitarian mine clearance

F. Multilateral

Handicap International
2013: 250,000 euros
Contribution Type: monetary
Activity Type: victim assistance (Ban advocates)

ICBL (International Campaign to Ban Landmines)
2013: 37,500 euros
Contribution Type: monetary
Activity Type: landmine Monitor
Any other relevant information:

3. Research and Development:

Research and development activities are conducted as well at the national as the international level.

a. National level:

- The PARADIS project (a prototype for assisting rational activities in humanitarian de-mining using images from satellites http://www.sic.rma.ac.be/Projects/Paradis/) started in 1998. Initially, this project was funded by the Belgian federal Office for scientific, Technical and Cultural Affairs and the Belgian Ministry of Defense, and conducted by the Royal Military Academy (RMA) with - in the beginning - the participation of the department of Geography (IGEAT) of the Free University of Brussels (ULB). This prototype is highlighting very interesting solutions for the management of humanitarian de-mining operations using satellite images, maps, context information and the IMSMA database and involves key actors including end-users, image analysts and scientists. Now this Project is only funded by the Belgian Ministry of Defense. Since 2004, it is in a phase of optimizing the developed solutions and to this end has undergone different tests:
  - in October 2005: with the help of NGO APOPO, tests have been performed in Mozambique in order to analyze the possibility to integrate the needs of APOPO in the system;
  - since November 2005: trials have been conducted in Afghanistan by the Belgian EOD-team in close (internet) collaboration with the SIC laboratory of the RMA;
  - in June 2006, further validation tests for some modules have taken place in Belgium in collaboration with EOD personnel.
  - in 2007, the PARADIS system has been finalized and presented to the end-users at SEDEE-DOVO. Presentations were targeting different levels of users (field officers, planners).

b. International level:

- The Royal Military Academy (RMA) was supporting the International Test and Evaluation Program (ITEP) by its participation to the executive Committee and to the different working groups, as well as by financing the ITEP secretariat. From 1st September 2004, the ITEP secretariat (http://www.itep.ws) is installed in the premises of the Royal Military Academy in Brussels, Belgium. The Memorandum of Understanding on the ITEP has come to an end in July 2010 without extension. Possible follow-on scenarios are under study.

- The RMA was chairing the CEN (Centre Européen de Normalisation) initiative to define a new standard on the soil characterisation for electromagnetic mine detection sensors. This project is funded by the European Commission and will last two years. The personnel costs are funded by the Belgian Defence in the scope of the BEMAT project (see above).

- The University of Brussels (VUB) was involved in the STREAM project (http://stream.etro.vub.ac.be/home.html), funded by the European Commission, on the development of (1) products, and (2) procedures for end-to-end technological platforms and tools for survey and decision support in humanitarian crisis: humanitarian demining and locations of refugee settlements. This project started in 2005 and will last 4 years.

- Two Belgian deminers and a scientist from the Royal Military Academy participated in the tests of the dual sensor detectors organized by Germany under ITEP umbrella (Oberjottenberg, 21 Sep 2009 – 16 Oct 2009).

Within the 7th Framework Programme (Security) of the European Commission a consortium of 26 European and Japanese partners co-ordinated by Prof. Yvan BAUDOUIN and Dr Ir Yann Yvinec prepares a series of cost-effective tools integrated in a comprehensive modular toolbox for helping the clearing of larger areas affected by anti-personal landmines, cluster munitions, explosive remnants of war (ERW) and unexploded ordinance (UXO) and a related
operational implementation of services, including standardization actions (TIRAMISU or Toolbox Implementation for Removal of Anti-personnel Mines, Submunitions and UXO)

Beside its management role, the Royal Military Academy, in particular:

- Define the Toolbox requirements and serve as Liaison Officer with an international Project advisory Board including the major stake-holders (UNMAS, GICHD, a.o.), with an End-User's Board including, in particular the Mine Action Centres of Croatia (CROMAC), Jordan (NCIDR) and Cambodia (CMAC).
- Contribute (with the DLR of Germany) to the processing of remote sensing data (satellite and airborne) through feature extraction, segmentation, 3D model from stereo data and hyperspectral data in order to prioritize the mine actions;
- Contribute (with the Military Institute of Technology of Poland (WITI) and the University of Genova (DIME)) to safe mine actions (protection, neutralization) through the development of testing facilities in his laboratory of Ballistics;
- Contribute to stand-off detection (UGV, UAV) techniques in close cooperation with Sensor's developers;
- Co-initiate CWA (with CEN); on Personal Protection Equipment and on Use of Machines for Technical Survey

Total direct costs in 2013: 291329 €
Total direct costs 2012-2013: 457424 €
FORM G: Steps taken to implement Article 9 of the Protocol: Generic preventive measures

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2013 to 31/12/2013

Steps taken to implement the provisions of Article 9 and the Technical Annex:

1. Munitions Manufacturing Management:
   a. Munitions are no longer manufactured by Belgian Defense. However during the procurement process the administration requests (by means of indispensable specifications in the request for tender) that the manufacturers comply with the production principles mentioned in article 9.
   b. The National (Defense) QAR (or NATO homologues) personnel is controlling the production process and the quality plan of the manufacturer.
   c. Safety & suitability for service is checked during evaluation (or proof is requested and evidence has to be provided in the offer). Once the contract is awarded, supplementary acceptance testing of pilot and serial lots are conducted following the specifications of the ammunition. Depending on the case those tests are conducted in the company and/or in Belgian Defense test facilities.
   d. Ammunition is acquired only when not in conflict with international law & treaties signed/ratified by BELGIUM. In accordance with article 36 of the first Additional Protocol to the Geneva Conventions, Belgium has a Commission for the Legal Review of New Weapons, Means and Methods of warfare.
   e. Transfer of ammunition to another Nation will only be possible when sufficient evidence (through In Service Surveillance testing) is available concerning the safety and reliability of the ammunition.

2. Munition Management during the whole "Life Cycle":
   a. "In Service Surveillance" is conducted in a pragmatic way.

Modular Structure:
ISM - In Service Monitoring: Tech visual Inspections, user findings, findings during renovation/maintenance
ISP - In Service Proof: Life Firing/functional testing
CM - Condition Monitoring: Chemical Analyses of energetic material, Radiographic/radioscopic investigation, dimensional control...
PT - Predictive testing: pre-stress a test item before examination, in order to provide a prediction of residual life
EDL - Environmental Data Logging: collecting data of endured Vibrations, Humidity, Temperature & Shocks.

b. Operational deployment:
- Ammunition is suffering severe stress (temperature, humidity, vibrations) when deployed on a theatre of operations. When the degradation is detected (by the user or by Ammunition technical personnel) a Technical degrading Report (TDR) is sent to the Material Manager who will decide what to do. In order to be able to detect degradation, the ammunition deployed on theatres of operations is accompanied with EDL (Environmental Data Loggers). The Data received is cross-checked with manufacturers data.

There are several options:
* Urgent demilitarization by EOD services when storage and/or transport safety is no longer guaranteed.
* Use in priority for training on theatre.
Evacuation to Belgium where this part of the lot is isolated and considered as a "fleet leader" for further In Service Surveillance. Possible demolition on theatre by Belgian EOD personnel or those from NATO partners when transport to Belgium is not economically justifiable.

Phasing out:

- Ammunition that is no longer used, because of unacceptable technical degradation or because the weapon system is no longer used, stays in inventory until demilitarized.
- Demilitarization: 3 options
  * Urgent demilitarization by EOD services when storage safety is no longer guaranteed.
  * Demilitarization in Belgian Demilitarization Installations
  * Outsourcing of demilitarization contracts through NSPA (NATO Support Agency)

- The storage safety (safe to handle) is guaranteed for as long the ammunition stays in inventory.

d. Best practices and operating procedures in the domain of storage, transport, field storage and safe handling.

Belgian Defense has ratified and implemented the following NATO AGREEMENTS and complies with the European legislation in the domain of Safe storage and transportation of ammunition and explosives:

**STORAGE:**
- AASTP-1 (ALLIED AMMUNITION STORAGE AND TRANSPORT PUBLICATION 1) (MANUAL OF NATO SAFETY PRINCIPLES FOR THE STORAGE OF MILITARY AMMUNITION AND EXPLOSIVES)
- AASTP-5 (Manual of NATO Safety Principles for the Operational Storage of Military Ammunition and Explosives)

**TRANSPORT:**
- AASTP-2 MANUAL OF NATO SAFETY PRINCIPLES FOR THE TRANSPORT OF MILITARY AMMUNITION AND EXPLOSIVES
- ADR, IMDG, IATA & RID for the transportation of dangerous goods

FORM H: Steps taken to implement Article 11 of the Protocol: Compliance

High Contracting Party: BELGIUM

Reporting for time period from: 01/01/2013 to 31/12/2013

[dd/mm/yyyy] [dd/mm/yyyy]

Steps taken to implement the provisions of Article 11:

Officers assigned as "Advisers in the Law of Armed Conflict" are available in each unit (up to battalion or independent company level) to advise military commanders on the application of the Law of Armed Conflict. The education programme of these advisers includes a general information about the Protocol V obligations.
