FORM A: Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

High Contracting Party: CZECH REPUBLIC

Reporting for time period from: 01/04/2013 to 31/03/2014
[dd/mm/yyyy] [dd/mm/yyyy]

Steps taken to implement the provisions of Article 3:

Some explosive remnants of war (ERW) from World War I and World War II can occur in the whole territory of the Czech Republic. They are disposed by the trained government police specialists. As for the application of the "explosive ordnance" of the Czech Armed Forces, the ERW can be caused during the training of the Czech Armed Forces units only. Each training using live ammunition is under record and has a specific rules. Only tested ammunition by the Ammunition Testing Centre (part of the Central Ammunition Base) can be used for the training of units of the Czech Army.

In case of eventual fail of live ammunition the disposal of ammunition is carried out by EOD specialists/pyrotechnics and in specific cases (rockets, aerial bombs, artillery ammunitions, etc.) is supervised by military EOD committee or by the specialists from the Ammunition Testing Centre. After each finishing of disposal an inspection of place of disposal is performed. Overall cleaning of the training areas especially the firing ranges is performed by the specialists.

The live firing is supervised by a target area observer collecting and then providing the available informations (according to the real situation) to the commander controlling the exercise and to EOD specialists/pyrotechnics.

According to this informations they search and dispose the unexploded ammunitions. The rest of unused ammunition is returned to the ammunition base.

According to the real situation each piece of ammunition during the live-firing exercise should be under control, so each of them is recorded to the special form.

One of the safety precautions introduced by the Czech Armed Forces in the field of ERW concerns releasing former military installations for the next civilian use. These installations are searched with attention relevant to potentially ammunitions and ecological disturbance.

FORM B: Steps taken to implement Article 4 of the Protocol: Recording, retaining and transmission of information

High Contracting Party: CZECH REPUBLIC

Reporting for time period from: 01/04/2013 to 31/03/2014
[dd/mm/yyyy] [dd/mm/yyyy]

Steps taken to implement the provisions of Article 4 and the Technical Annex:

The records connected with using the "explosive ordnance", which could potentially become ERW, are being kept by means of logistician records. These records are periodically handed over to the central evidence of the Czech Armed Forces (the Central Ammunition Base) through the logistic authorities. The database is an internal document of the logistic authorities of the Czech Army.

Presently there is a technical - information centre for sending and retaining all the reports related to overall EOD activities (not only such as incidents, findings or disposals, but also training related activities) in Technical Information Support Department (OTIP) EOD/IEDD operating as a national EOD centre (located at 15th Engineer Brigade).

OTIP is also registered on file of experts and experts agencies (Protocol II CCW, form G) and it is a partner for cooperation with the State Police specialists.

OTIP has begun to use the EOD information system based on Swedish information system EOD (EOD IS), which is established approximately in 16 NATO nations and PfP countries. Credible and accurate information about the ammunition are the most important for EOD operations and by the means of EOD IS system it can be collected, shared and distributed or exchanged to EOD staff worldwide.

The database exists in electronic form and serve for assesment and as a tool intended to improve level of tarining EOD experts.

As far as civil areas with potential ERW presence are concerned, these are secured by the Police experts of the Czech Republic.

Steps taken to implement the provisions of Article 9 and the Technical Annex:

The Czech Republic has explosive ordnance governed by national laws and by regulations issued by the government authorities that control the production processes, munitions management, training of all personnel and transfer. These laws and regulations are compatible with the relevant EU directives.

Government authorities cooperate and complement each other in this sphere. The Ministry of Foreign Affairs, Ministry of Industry and Trade, Ministry of the Interior and the Ministry of Defence are most closely involved in such cooperation.

The Czech Republic's laws and implementing are published in Collection of Laws, which is available to the public www.mvcr.cz. Laws forming the legislative basis for the national control system can also be found on the websites of the competent ministries.

The most important laws and regulations are the following:

- o Act No. 119/2002 on firearms and ammunition, as amended;
- o Act No. 156/2000 the proofs of firearms, ammunition and pyrotechnic devices;
- o Act No. 61/1988 on mining activity, explosives, as amended;
- o Act No. 219/1999 on Armed Forces of the Czech Republic, as amended.

The Acts are accompanied by implementing regulations.

Any other relevant information:

Based on our experience, Partial Pyrotechnic Sanitation (PPS) can be characterised as a process of search, detection and destruction of ammunition and elements of ammunition in the target and endangered areas of the former fire ranges, and remains of ammunition left or dumped in ammunition dumps, buildings or open terrain. An unexploded ordnance (UXO) from Austria-Hungarian period, from the Czechoslovakian period, from the period of the German occupation during the World War II, and UXO of the Soviet Army, which was based there till 1989, could be found there.

Mine clearance programmes: The Partial Pyrotechnic Sanitation in the former military zones has been already finished in March 2004.

Explosive ordnance disposal operations: Within the Czech Republic explosive ordnance disposal (EOD) operations on finding of explosive remnants of war ERW are done by Explosive Ordnance Disposal specialists of Czech Republic Police and Military Police.* EOD specialists of Czech Republic Police and Military Police have established an extensive cooperation.

- PROTOCOL V -

National laws of the Czech Republic regulate EOD service of Czech Republic Police. EOD service of Military Police is regulated by Act. No. 124/1992, as amended, and internal standards. EOD service of Military Police is fulfilling the tasks of police protection of the armed forces and of state property administrated or maintained by the Ministry of Defence. EOD specialists of Military Police are also operating with military contingents of the Armed Forces of the Czech Republic, that are deployed abroad, where they cooperate with engineer units.

* Chief of the Military Police is directly subordinate to the Ministry of Defence.
