

LAWS - Military Effects Panel

LTC Christopher Korpela, Ph.D.
U.S. Army

November 14, 2017

Geneva, Switzerland

Main Points

- All weapons systems development is driven by requirements
- There are many operational advantages of unmanned and remotely operated systems
- Autonomous systems leverage the same operational advantages of unmanned systems
- AWS offer potential humanitarian benefits, such as less collateral damage
- Weapons employment is the commander's role and responsibility
- Operational environment and context are key

Squad Operations Vignette, 2025
