SAFETY STORAGE OF AMMUNITION WITHIN THE ROMANIAN MoND

Protocol V Meeting of Experts
Convention on certain conventional weapons - CCW

Geneva

April 25-27th 2012
AGENDA

- General remarks
- Legal framework
- Ammunition storage
- Civilian protection
- Coordination with NGOs
General remarks

- Rou MoND strictly enforces ammunition storage rules;
- There is the appropriate legal framework in accordance with CCW provisions;
- Storage and use restrictions are determined by periodical testing;
- Specific procedures are established for specific type of ammunition.
Legal framework

- Law no. 122/2011 concerning the regime of weapons, military assets and ammunition under the administrative authority of the Ministry of National Defence.
- Military regulations concerning ammunition storage, handling, transportation, competency and periodical verifications.
Ammunition storage

- Safety storage of ammunition;
- The security of ammunition storage facilities;
- The access into ammunition storage facilities;
- Competency and periodical verifications.
Civilian protection

- The force protection measures to avoid the civilian exposure to ERW;
- EOD personnel to conduct ERW awareness;
- All operation plans (OPLANS) assess the risks of civilian exposure to ERW.
Coordonation with NGOs

- ROU military SOPs include the requirement for liaison and cooperation with IOs/NGOs/humanitarian organizations;
- ROU offers medical services to victims of ERW;
- ROU military forces share information on removal, clearing and destroying of ERW
Conclusions

- Romanian MoND strictly implements the provisions of Protocol V;
- Romanian MoND ensures the safety storage of ammunition;
- Rou MoND makes its priority to improve civilian protection measures against the risks generated by ERW.
Thank you for your attention!
