## AMENDED PROTOCOL II

### Form A                      Dissemination of information

---

Article 13,  
paragraph 4 (a)

“The High Contracting Parties shall provide annual reports to the  
Depositary [...] on [...]:

(a) dissemination of information on this Protocol to their armed forces and  
to the civilian population;”

*Remark:*

High Contracting Party:

**THE REPUBLIC OF CROATIA**

Reporting for time period

from: **01/01/2011**  
dd/mm/yyyy

to: **31/12/2011**  
dd/mm/yyyy

#### **INFORMATION TO THE ARMED FORCES:**

Since Croatia is one of the High Contracting Parties to the Convention on Cluster munitions, that Convention is added to the curriculum at the Croatian Defence Academy. The introduction of the Convention on cluster munitions to the Armed Forces was used to reshape and expand the curriculum time dedicated at all levels of education on the agreements, treaties and conventions signed and ratified by the Republic of Croatia. Starting at basic, advance and senior NCO courses it expands and gets more in-depth coverage all the way up to the War College level. The new expanded curriculum is being implemented from the beginning of September 2011.

#### **INFORMATION TO THE CIVILIAN POPULATION:**

The activities by Croatia to disseminate information about the Convention and the Protocols to the civilian population take place at several levels. The texts of the Convention and all Protocols to the Convention ratified by the Republic of Croatia were published in Official Gazette of the Republic of Croatia-International Agreements and are hence available to public as a bulletin in printed version and on web site [www.nn.hr](http://www.nn.hr). Dissemination of information about the CCW Convention and its protocols to civilian population also includes mine risk education (MRE) activities. Croatian Ministries, Government and State Administrative Offices as well as professional groups working with and for adults and children in Croatia, including NGOs and international organizations, pass specific training according to their role in the national implementation of the Convention and Protocols. Croatian Red Cross with its local branches (in local communities), CROMAC and the Association of civil Victims of Homeland War are active in events and lectures where MRE messages are given.

Dissemination of information about the CCW Convention and its protocols to civilian population is performed through mine risk education (MRE) activities.  
Croatian Ministries, Offices of the Government and State Administrative Offices as well as

## AMENDED PROTOCOL II

professional groups working with and for adults and children in Croatia, including NGOs, and international organizations, pass specific training according to their role in the national implementation of the Convention and Protocols.

Croatian Red Cross with its local branches (in local communities), CROMAC and the Association of Civil Victims of Homeland War are active in events and lectures where MRE messages are given. The lectures are always bearing in mind that mine risk education is effective in terms of reducing the number of mine casualties. Interesting presentations (lectures) on mine/UXO risk education were organised for children, adults, and especially for target groups (hunters, fisherman, public companies employees etc.). The purpose of mine/UXO risk education was to learn and spread knowledge on danger of mines.

Promotion to the public and the media is an especially important way to directly spread safety messages about the dangers of ERW, which seeks to inform as many citizens at the local and national level. Creating and distributing posters, flyers, brochures, etc. and publish news stories in print and electronic media (radio and TV spots) includes a significantly larger number of citizens, and further points to the still present danger of landmines in our country.

The Croatian Police department is continuing it's "Less arms, less tragedies" program in partnership with UNDP. The citizens are being educated and encouraged to turn in their weapons and ordinance leftover from the Homeland War. The Police department also reacts on basis of citizen's telephone calls and finds large quantities of weapons within their investigations of various criminal activities.

Realizing the scope of the problem in Croatia, the Police department is determined to continue this program in the future.

#### **MINE CLEARANCE PROGRAMMES:**

The Republic of Croatia confirmed its resoluteness in solving the mine problem by passing the Law on Humanitarian Demining in 1996, establishing the Croatian Mine Action Centre in 1998, fulfilling the commitments undertaken by joining the Ottawa Convention as well as providing for permanent and stable sources of financing in the State budget, in the World Bank loans and from Croatian public companies.

CROMAC is directly liable to the Government of the Republic of Croatia. The Government appoints the representatives of ministries to CROMAC Council that acts as a mediator between the Government of the Republic of Croatia, ministries dealing with mine problem as part of their scope of activities and CROMAC.

Humanitarian Demining Plan 2011 was based on the Law on Humanitarian Demining, the National Mine Action Strategy of the Republic of Croatia and the Three-Year Humanitarian Demining Plan 2009-2011 passed by the Government of the Republic of Croatia.

The Croatian Mine Action Centre drafted the Plan with the consent of the Ministry of Finance, the Ministry of Interior, the Ministry of Defence, the Ministry of Sea, Transportation and Infrastructure, the Ministry of Environmental Protection, Physical Planning and Construction, the Ministry of Regional Development, Forestry and Water Management, the Ministry of Agriculture, Fisheries and Rural Development, the Ministry of Tourism and the Ministry of Culture. The Plan was then approved by Croatian Government.

Through 209 demining projects, mine threat has been removed from an area that amounts to 27.665.260 m<sup>2</sup> while additional 42.690.058 m<sup>2</sup> was cancelled through general survey activities. All these activities resulted in the total decrease of the suspected hazardous area in Croatia in the amount of 70.355.318 m<sup>2</sup>. By December 31, 2011, the Croatian Mine Action Centre has also updated areas contaminated only with unexploded ordnance in the size of 7,3 km<sup>2</sup> and they are marked with 389 UXO hazard signs. According to that, suspected hazardous area in the Republic of Croatia on December 31, 2011 totalled 745,5 km<sup>2</sup>.

In 2011 the largest share in demined area with a share of 56,7% are agricultural lands which the

## AMENDED PROTOCOL II

local and regional governments have stated as their priorities crucial for start of agricultural production. Of the total contracted demining operations in 2011, 32% refers to the priorities related to safety, 65,7% related to socio-economic development, and 2,3% on the environmental priorities. During demining activities total number of 14.895 mines and UXO's was found and destroyed, out of which, 4.416 mines and 10.479 UXO. 34 commercial companies with the total capacities of 636 deminers, 54 demining machines and 20 mine detection dogs conducted demining operations.

The Annual demining plan was realized using the following funding sources - state budget funds, legal entities and state administration bodies, EU funds and donations. The State Budget had the biggest financing share with 62,4% of total funds spent and contracted (legal entities and state administration bodies-31,3%, donations-5,8%, EU funds-0,5%). From the establishment of the Croatian Mine Action Centre until December 31, 2011, a total of 493 million EUR has been invested in demining operations (from all sources). State budget accounts for 58% of the total funds for mine clearance with a total of 286 million EUR.

Parallel with the implementation of the general survey and search and demining operations, the control of marking and, if necessary, additional marking of suspected hazardous areas was conducted in order to create a clear boundary between safe and mine suspected areas. The locations of mine danger signs are one of the basic elements of the Mine Information System (MIS) that is shown on the maps given to the local authorities, police administration and individuals that have requested maps on MSA situation. On December 31, 2011 the total mine suspected area was marked with 15.861 mine danger signs.

**The Croatian military facilities** including barracks, Air bases, training areas, radar stations and storage sites are partially contaminated by land mines, cluster munitions remnants and other UXO's. Total suspected contaminated area amounts to approximately 2,5 km<sup>2</sup>. The Demining battalion of the Engineering regiment is responsible for clearance of all military facilities. During the year 2011, an area of 38 431 m<sup>2</sup> was searched and cleared. Although no landmines were found during the process, 317 pieces of UXO's were discovered and destroyed.

On Sept. 13, 2011 a local fire engulfed the military storage site Pađene (near Knin) and triggered several explosions. As a result, an area of 5 km radius was contaminated with exploded and unexploded remnants of cluster munitions, grenades and other ordinance. Since the incident, Deming battalion searched and cleared an area of 13,5 km<sup>2</sup>. All exploded and UXO's found were removed and destroyed. There were no casualties due to this incident. Clearance activities are continuing.

**The Croatian Police department** is continuing it's "Less arms, less tragedies" program in partnership with UNDP. The citizens are being educated and encouraged to turn in their weapons and ordinance leftover from the Homeland War. Among large arsenals of SALW and other weapons, during 2011. the Police department in total collected **376 AP mines and 396 AV mines**.

### **REHABILITATION PROGRAMMES:**

In line with the Law on Humanitarian Demining, mine risk education and mine victims assistance was conducted during this period with co-coordinative role of the Croatian Mine Action Centre and co-operation with non-governmental organizations, different institutions and international organizations and associations.

#### **Mine/UXO risk education**

Different mine risk education activities, marking of mine suspected area, possibility of getting an insight into mine situation through submission of MSA maps and CDs as well as using

## AMENDED PROTOCOL II

[CROMAC web portal](#) have a positive effect on the prevention of mine incidents, but also require additional activities of informing the public and media with mine action aspects.

In 2011 there were 7 mine incidents with 6 victims (4 deminers). One person was killed (deminer) and 2 persons received heavy physical injuries. In 2 incidents there were no casualties. In 2011, annual rate of mine victims was dropped in regard to 2010.

Interesting presentations (lectures) on mine/UXO risk education were organised for children, adults, and especially for target groups (hunters, fisherman, returnees etc.). The purpose of mine/UXO risk education was to learn and spread knowledge on danger of mines.

In 2011, the Croatian Mine Action Centre coordinated a large number of activities related to informing about mine danger.

The Association of Croatian Civil Victims of War of the Republic of Croatia, Croatian Red Cross, Croatian Mine Action Centre and the Ministry of Interior organized four panels named "Children in Mine Environment" in elementary schools all over the country. CROMAC organized 24 additional lectures with the same instructors.

Employees of the Croatian Mine Action Centre, throughout the year, participated in Radio Zagreb broadcast program – Cottage, presenting the most current content and information related to mine action.

All actions in education and other activities related to mine danger could have been monitor on the web site of the Croatian Mine Action Centre, which is updated daily and has the latest news. Such practice will be continued in the future.

Croatian Mine Action Centre has participated in 17 humanitarian actions that were held in 15 cities. On the improvised minefields, the mine situation in Croatia, the work of deminers and methods of detection of mines and UXO were presented.

In 2011 the Croatian Mine Action Centre, at the request of government bodies, regional and local governments, public enterprises, as well as Croatian citizens, issued a 448 insight and/or maps of the mine suspected areas. In addition to cartographic representations and insight, the Croatian Mine Action Centre has developed a unique web application MISportal, available to all internet users, where it is possible to see the locations of mine suspected areas. In 2011, tens of thousands of users, most from abroad, visited MISportal.

“Croatia without Mines“– Trust Fund for Humanitarian Demining of Croatia has launched a project entitled "Education and information of the agricultural population of the danger of landmines". Croatian Mine Action Centre actively participated in preparation of the project that will start in 2012.

Croatian Red Cross has continued with the Programme about the mine danger in collaboration with 14 County Prefects and 49 local Red Cross branches, all located in the vicinity of mine suspected areas.

Daska Theatre played 10 shows, "No, no MI-NE" in the counties in which there are mine suspected areas. That completes the project funded by the U.S. Government through the ITF started in 2010. In total, 61 shows were played.

In 2011 there was also traditional media campaign “April- month of mine protection” on TV and radio stations and numerous other media related activities with the aim of MRE.

### **Providing assistance to mine victims**

The Republic of Croatia has developed public health care structure that includes clinics, clinical centres, specialized polyclinics, hospitals and rehabilitation centres. All persons being involved in the incidents are entitled to health protection and acquisition of orthopaedic aids to the amount covered by the Croatian Health Insurance Institute. The rights are regulated by a number of laws, rules and regulations. Relevant state administration authorities were involved in solving the problems of mine victims relating to medical rehabilitation.

## AMENDED PROTOCOL II

In accordance with the Law on Humanitarian Demining, mine victims assistance was conducted with CROMAC coordinative role and in co-operation with ministries, domestic and foreign organizations and NGO's.

In cooperation with the association "Mine Aid", second edition of a brochure "Opportunities and Rights" was released designed for people with disabilities – mine victims, and funded by the Ministry of health and Sisak-Moslavina County. The brochure was printed in 850 copies and distributed to various institutions on national and local level.

In 2011, the process of integrating the collected data to create a unified database of mine victims was continued. Coordination for assistance to mine victims composed of representatives of institutions and organizations has prepared the "Agreement on Cooperation in the development and exchange of data collection on ERW victims on mined, mine suspected and shelled areas in Croatia". The agreement was signed by all involved parties. Implementation of the "Croatian action plan to help people victims of mines and unexploded ordnance 2010 - 2014" based on the commitments undertaken by signing the Ottawa Convention and the Convention on Cluster Munitions was carefully monitored. The main goal of this plan is to improve the quality of life of people injured by mines and unexploded ordnance as well as their families.

Competent government authorities dealt with the problems of mine victims in the part of medical rehabilitation. Other forms of aid were mainly implemented by non-governmental sector, and funding was secured through donations of international and domestic entities.

Thus in 2011, various one-off projects were implemented through financial assistance to mine victims and their education (scholarships, legal, psycho-social and medical assistance or orthopaedic aids).

### **Individual assistance**

The Republic of Croatia has highly developed legal framework relating to the persons with disabilities in realizing their legitimate rights and status. The status and various forms of rights are being realized through over 200 different laws and by-laws. There are 4 basic forms of mine victim assistance the ministries, different institutions, non-governmental sector, a number of organizations and individual initiatives take part in-medical care, physical rehabilitation, psychological help and social reintegration and professional and economic rehabilitation.

There are 29 specialized hospitals for physical rehabilitation in Croatia and one Institute for rehabilitation and orthopedic aids in Zagreb. Centers for psychosocial help and assistance in all 20 counties of the Republic of Croatia and City of Zagreb were opened, aiming at providing the assistance to all people with disabilities including mine victims with war traumas including mine victims and members of their families.

Additional payment for better quality prostheses in the amount of 7.000 to 50.000 HRK is the most frequent form of individual support. Several dozens of persons ask for such type of support each year.

### **Collective programs of rehabilitation and re-integration**

Mine Aid Association implemented a project "Psychological support and strengthening of civilian war disabled persons - mine victims," which comprises 32 direct beneficiaries and 63 family members. The project consisted of psycho-therapeutic treatment for a period of 7 months, visits to mine victims and cash assistance for basic needs. Four educational lectures and the seminar "Promoting the rights of people injured by mines and coordination of social services and activities" were held as well as workshops "Rehabilitation, employment and self employment of people with disabilities" and "Expanding the network of psychosocial and economic support".

The project "Building and strengthening support networks for individuals and families injured by mines" was also implemented.

## AMENDED PROTOCOL II

### **Form E                      International technical information exchange, cooperation on mine clearance, technical cooperation and assistance**

---

Article 13,  
paragraph 4 (e)

“The High Contracting Parties shall provide annual reports to the  
Depositary [...] on [...]:  
(e) measures taken on international technical information exchange, on  
international cooperation on mine clearance, and on technical cooperation  
and assistance;”

*Remark:*

High Contracting Party: **THE REPUBLIC OF CROATIA**

---

Reporting for time period

from: **01/01/2011**

dd/mm/yyyy

to:

**31/12/2011**

dd/mm/yyyy

#### **INTERNATIONAL TECHNICAL INFORMATION EXCHANGE:**

Based on the Agreement on the transfer of tasks, Article 2, signed between the Croatian Mine Action Centre and CROMAC- Center for Testing, Development and Training (CROMAC-CTDT) on 30<sup>th</sup> October 2003, CROMAC-CTDT took over the activities and projects focused on testing of mine detection and mine clearance equipment, as well as research of new methods and technology.

#### **International technical information exchange**

- In January 2011, CROMAC-CTDT representatives visited the Great Socialist People's Libyan Arab Jamahiriya and had a meeting with the colleagues from the National Programme for Demining and Land Reclamation. The discussions were held regarding the training programme, and it was confirmed that Libyan colleagues will be trained in the Republic of Croatia. This training programme will be defined later by separate agreements.
- In April 2011, CROMAC and CROMAC-CTDT were co-organizers of the 8th International Humanitarian Demining Symposium which was held in Sibenik, Croatia. The symposium was attended by 170 participants from all over the world.
- In May 2011, based on the CROMAC-CTDT project, on a decree of the Vice president of the Croatian Government and Minister of Foreign Affairs and European Integrations, and on a Donation Contract, a team of Croatian experts in the field of mine action (CROMAC and CROMAC-CTDT) visited Colombia with the aim of training and preparing the Colombian side for a procedure of proclaiming legislature governing mine action.
- In May 2011, an EOD training course Level 1 finished for candidates from Southeast Europe. The training was conducted by CROMAC-CTDT and financed by the US State Department through ITF.
- In July 2011, representatives of CROMAC and CROMAC-CTDT signed a Memorandum of Understanding with representatives of the Turkish company POLTEK, regarding demining of the Turkish-Syrian border. Croatian representatives were invited for partners because of their reputation in the world of mine action.

## AMENDED PROTOCOL II

- In July 2011, delegation of the Armed Forces of Bosnia and Herzegovina visited CROMAC-CTDT.
- In November 2011, a training course entitled “Training for Unexploded Ordnances (UXO) Detection and Removal”, 2nd level, was held. Participants were candidates from Southeast Europe. The training course is conducted by CROMAC-CTDT and financed by the US State Department through ITF.

### **INTERNATIONAL COOPERATION ON MINE CLEARANCE:**

The international cooperation on mine clearance of the Republic of Croatia during the above mentioned period was performed thanks to the donors' contributions from different countries, organizations and individuals. The European Union, United States of America and Germany had the biggest share in financing humanitarian demining activities.

Demining projects from the donation of the Government of the USA are implemented through International Trust Fund for Humanitarian Demining and Mine Victims Assistance (ITF). The donation of the FR of Germany was implemented through Arbeiter Samariters Bund (ASB). The Governments of Japan and Monaco have also financed demining projects.

Other donations are from different NGO's and organizations like AMCHAM, VIPnet, PBZ, Demining Fund of Vukovar-Srijem County and Croatian-American Golf Association.

### **TECHNICAL COOPERATION AND ASSISTANCE:**

Cooperation on international level required close cooperation between CROMAC and Croatian Ministry of Foreign and European Affairs, Croatian diplomatic missions throughout the world and Croatian Ministry of Defense. Apart from fulfilment of the commitments undertaken by Croatia signing the Ottawa Treaty, international cooperation activities have mostly consisted of raising demining funds, capacity building, mine victims assistance and mine risk education. International cooperation also includes taking part in different conferences at regional and international level that enable us to promote and present achievement of Croatian mine action system.

The establishment of Cluster for humanitarian demining created the opportunity for the export of Croatian knowledge and technology to foreign markets or in countries that have a mine problem. [Cluster](#), through its founders and its associated members, in one place ensures the capacity, resources and knowledge to carry out all activities related to mine action. As the knowledge, technologies and products greatly surpassed the needs of Croatia, the intention is to offer the same knowledge and resources to countries with mine problem for its faster removal. The main objective of this association is to improve efficiency through a variety of advanced economic processes: changing and improving methodology, components, machines, services and through adaptation and access to new regions, and all for the purpose of establishing a mine action as Croatian export product.

Cluster now comprises of 14 members, except for Croatian Mine Action Centre and CROMAC-CTDT, there are the manufacturers of demining machines DOK-ING Ltd., Đuro Đakovic Special Vehicles Inc. and demining company Istraživač Ltd., manufacturers of protective equipment Borovo Gumitrade Ltd. and Šestan Busch Ltd., a manufacturer of metal detectors Vallon GmbH from Germany and manufacturer of magnetic locators Schonstedt Instrument Company from USA, Regional Center for Underwater Demining (RCUD) from Montenegro, Blas-tip Ltd. from Slovenia, demining companies MKA\*Deming Ltd. and Mungos razminiranje Ltd. as well as Geofoto Ltd.

## AMENDED PROTOCOL II

### Form G Information to the UN-database on mine clearance

Article 11,  
paragraph 2,

“2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance.”

*Remark:*

High Contracting Party: **THE REPUBLIC OF CROATIA**

Reporting for time period

from: **01/01/2011**

dd/mm/yyyy

to: **31/12/2011**

dd/mm/yyyy

#### **MEANS AND TECHNOLOGIES OF MINE CLEARANCE:**

Mine clearance capacities included a complete equipment of 34 commercial demining companies that are authorized by Croatian Ministry of Interior to perform mine clearance activities. They also need to have accreditation from Croatian Mine Action Center to perform such actions.

All the employees that work in mine clearance are wearing protective equipment that consists of flack jacket with protection for groins and helmets with visors. For special cases of UXO demolition, companies use ballistic suits. Following equipment is in usage for humanitarian demining activities: 636 metal detectors, 54 demining machines including all types (medium, light and heavy), excavators, machines for vegetation clearing and 20 mine detection dogs.

In Croatia, mine clearance actions are mostly performed as a combination of mechanical demining, manual detection and mine-searching dogs. Croatian Mine Action Centre Standard operating procedures also prescribe the entire methodology of humanitarian demining activities. Frequent use of demining machines puts Croatia among the leading states with industrial mine clearance.

#### **LISTS OF EXPERTS AND EXPERT AGENCIES:**

Mine clearance experts are employed in various institutions, which deal with mine action issues:

Croatian Mine Action Centre- CROMAC:

- Zdravko Modrušan – Director,
- Mirko Ivanušić – Deputy Director
- Nikola Gambiroža – standardization, standard operating procedures, Demining Machines Evaluation Committee
- Tomislav Ban – quality assurance and quality control
- Davor Laura – general survey, making of projects, mine situation database
- Miljenko Vahtarić – planning, analysis and finances
- Neven Karas – legislative issues
- Heads of CROMAC Regional offices (Damir Stojković, Josip Čerina, Dubravko Krušarovski) – operational performance

## AMENDED PROTOCOL II

CROMAC-CTDT Ltd.(Croatian Mine Action Centre - Centre for Testing, Development and Training) – conducts testing and certification of mine detection and mine clearance equipment; research and development of new mine detection and mine clearance methods and technology; and training in the field of mine action.

Cluster for Humanitarian Demining Ltd. integrates experience and capacities of the Croatian Mine Action Centre, CROMAC-CTDT, commercial demining companies and equipment manufacturers, thus resulting in uniting of all demining subjects in the Republic of Croatia and opening the door for export of Croatian know-how and technologies to foreign markets i.e. countries facing the mine problem.

There are 34 commercial companies that are authorized by the Ministry of the Interior and they regularly apply for public tenders for mine clearance projects:

1. BIOS-F d.o.o.
2. BUMERANG d.o.o.
3. CENTURION d.o.o.
4. COR d.o.o.
