FORM A Steps taken to implement Article 3 of the Protocol: Clearance, removal or destruction of explosive remnants of war

High Contracting Party: Republic of Lithuania

Steps taken to implement the provisions of Article 3

Note: According to Article 1, paragraph 4 of the Protocol, Article 3 only applies to Explosive Remnants of War (ERW) other than existing ERW as defined in Article 2, paragraph 5 of the Protocol. ERWs found in the territory of the Republic of Lithuania result from the First and the Second World Wars as well as pollution of former Soviet military bases, i.e. they existed before entry into force of the Protocol. Therefore all steps taken by the Republic of Lithuania with regard to clearance, removal or destruction of ERW should be regarded as a voluntary measure, which does not result from any obligation under the Protocol.

As Lithuania is a mine free country no specific mine clearance programmes are required. However, there is a certain degree of contamination by explosive remnants of war (ERW) resulted from the First and the Second World Wars as well as pollution of former Soviet military bases.

In 2007 the Programme for the Clearance and Prevention of Explosive Remnants of War for the years 2007-2020 was approved by the Government of the Republic of Lithuania. The primary objective of the Programme is to ensure that ERWs are found, their potential threat to people prevented and adverse effects to private and public activities minimised. The Programme deals with the widest possible range of ERWs, including anti-personnel mines, anti-vehicles mines and cluster munitions.

In 2013 the Programme was amended assigning more functions to the Fire and Rescue Department under the Ministry of Interior.

Lithuania started marking and ERW clearance activities in summer 2008. Engineer Battalion of the Armed Forces is tasked to clear and destroy the explosives.

In 2018 was checked and cleaned about 29 ha of polluted territories and found 972 pieces of different explosive ordnance. From 2008 till the end of 2018 Lithuanian Armed Forces EOD company checked and cleaned over 853 ha of polluted territories and found over 20 500 pieces of different explosive ordnance (anti-vehicle and anti-personnel mines, mortar, shells, grenades, cluster munitions, aviation bombs, ammunition etc.).

FORM E Steps taken to implement Article 7 of the Protocol: Assistance with respect to existing explosive remnants of war

High Contracting Party: Republic of Lithuania

International cooperation and assistance:

Lithuanian Navy took part in the international disposal of maritime explosive remnants of war operation *Open Spirit 2018* in the Baltic Sea. Lithuania was represented by three ships.

Lithuanian Armed Forces EOD section size unit participated in the international demining exercise *Detonators 2018* in Latvia which focused on demining of ERW left from the II World War.

Lithuanian contribution to international Trust Funds in 2018:

Activity, funding and/or in-kind contributions	Implementing organisation or agency	Date	Contribution
EU Trust Fund for Colombia	European Commission	2018	12 000 Eur
NATO PfP Trust Fund Project to Support Practical Cooperation with Ukraine in the Area of medical Rehabilitation	NATO	2018	In kind
