AMENDED PROTOCOL II

Form A Dissemination of information

Article 13,
paragraph 4 (a)

“The High Contracting Parties shall provide annual reports to the
Depositary [...] on [...]:

(a) dissemination of information on this Protocol to their armed forces and
to the civilian population;”

Remark:

High Contracting Party:

**THE REPUBLIC OF
CROATIA**

Reporting for time period

from: **01/10/2009**

dd/mm/yyyy

to: **30/09/2010**

dd/mm/yyyy

INFORMATION TO THE ARMED FORCES:

The information to the Armed Forces remains unchanged.

INFORMATION TO THE CIVILIAN POPULATION:

The activities by Croatia to disseminate information about the Convention and the Protocols to the civilian population take place at several levels.

The texts of the Convention and all Protocols to the Convention ratified by the Republic of Croatia were published in Official Gazette of the Republic of Croatia-International Agreements and are hence available to public as a bulletin in printed version and on web site www.nn.hr

Dissemination of information about the CCW Convention and its protocols to civilian population also includes mine risk education (MRE) activities.

Croatian Ministries, Offices of the Government and State Administrative Offices as well as professional groups working with and for adults and children in Croatia, including NGOs, and international organizations, pass specific training according to their role in the national implementation of the Convention and Protocols.

Croatian Red Cross with its local branches (in local communities), CROMAC and the Association of civil Victims of Homeland War are active in events and lectures where MRE messages are given. The lectures are always bearing in mind that mine risk education is effective in terms of reducing the number of mine casualties. Interesting presentations (lectures) on mine/UXO risk education were organised for children, adults, and especially for target groups (hunters, fisherman, returnees etc.). The purpose of mine/UXO risk education was to learn and spread knowledge on danger of mines.

AMENDED PROTOCOL II

Croatian Red Cross organized activities in the area of 12 counties i.e. 49 municipal associations (local Red Cross branches) that are contaminated with mines. 42 instructors conducted regular program and organized different preventive activities with the aim to prevent injuries and to reduce the risk of death of the population.

The original idea of a local project to build playgrounds for children was created on the initiative of the Red Cross in 2000 and until 2010, 72 playgrounds were built in areas located near the hazardous area. There is great significance in building a playground in order to prevent harm to children and for the purpose of creating safe places for their game. The construction of the field, includes all residents in the community in improvement of their living conditions with their joint forces and in their own environment.

Promotion to the public and the media is an especially important way to directly spread safety messages about the dangers of ERW, which seeks to inform as many citizens at the local and national level. Creating and distributing posters, flyers, brochures, etc. and publish news stories in print and electronic media (radio and TV spots) includes a significantly larger number of citizens, and further points to the still present danger of landmines in our country.

On August 1, 2010, Croatian Mine Action Centre has in cooperation with the Ministry of Foreign Affairs and European Integration and Mine Aid NGO marked the entry into force of the Convention on cluster munitions by promotional stand in Zagreb.

AMENDED PROTOCOL II

Form B **Mine clearance and rehabilitation programmes**

Article 13,
paragraph 4 (b) “The High Contracting Parties shall provide annual reports to the
Depository [...] on [...]:

(b) mine clearance and rehabilitation programmes;”

Remark:

High Contracting Party: **THE REPUBLIC
OF CROATIA**

Reporting for time period

MINE CLEARANCE PROGRAMMES:

The Republic of Croatia confirmed its resoluteness in solving the mine problem by passing the Law on Humanitarian Demining in 1996, establishing the Croatian Mine Action Centre in 1998, fulfilling the commitments undertaken by joining the Ottawa Convention as well as providing for permanent and stable sources of financing in the State budget, in the World Bank loans and from Croatian public companies.

CROMAC is directly liable to the Government of the Republic of Croatia. The Government appoints the representatives of ministries to CROMAC Council that acts as a mediator between the Government of the Republic of Croatia, ministries dealing with mine problem as part of their scope of activities and CROMAC.

Annual Demining Plan is based on priorities and requests of counties that are compliant to their development programs, programs of reconstruction and return of displaced people, needs and requests of public companies and other demining beneficiaries, defined mined and mine suspected area and financial means secured. The Plan is approved by Croatian Government.

Humanitarian Demining Plan 2010 is based on the Law on Humanitarian Demining, the National Mine Action Strategy of the Republic of Croatia and the Three-Year Humanitarian Demining Plan 2009-2011 passed by the Government of the Republic of Croatia.

The Croatian Mine Action Centre drafted the Plan with the consent of the Ministry of Finance, the Ministry of Interior, the Ministry of Defence, the Ministry of Sea, Transportation and Infrastructure, the Ministry of Environmental Protection, Physical Planning and Construction, the Ministry of Regional Development, Forestry and Water Management, the Ministry of Agriculture, Fisheries and Rural Development, the Ministry of Tourism and the Ministry of Culture.

On January 1, 2010, the overall mine suspected area (hereinafter: MSA) of the Republic of Croatia totalled 887.7 km², covering the territory of 104 towns and municipalities. It was marked

AMENDED PROTOCOL II

with 16.027 mine warning signs.

The conduct of planned activities in 2010 will result in total reduction of mine suspected area of the Republic of Croatia for 67 km² out of which 30.050.873 m² by demining and the rest by general survey activities. Out of the total areas planned for demining in 2010, 31,7% refer to safety priorities, 65,4% refer to socio-economic development and 2,9% to ecological priorities. The Annual demining plan is realized using the following funding sources - state budget funds, legal entities and state administration bodies, World Bank loan funds and donations. The State Budget had the biggest financing share with 62% of total funds spent and contracted.

From September 30, 2009, to September 30, 2010 humanitarian demining activities enabled the realization of 188 projects of mine clearance and mine searching on the area that amounts to 39.715.575 m². During the execution of these projects, 9.384 mines (3.536 AP and 5.848 AV) and 1.206 pieces of UXO's were found and destroyed. The new National Mine Action Strategy in the Republic of Croatia was approved by Croatian Parliament in mid-September 2009 and it consists of all relevant information on mine action since 1991, current status of mine suspected area (size, positioning, structure and impact on society and economy), a description of available capacities for mine action execution and their performance and basic goals to be achieved in the period 2009 to 2019 with an established method and preconditions for their realization.

Also, the Humanitarian Demining Plan for the period 2009 to 2011 was approved by Croatian Government in 2009. It defined the basic tasks and their implementation for the next three-year period. Basic characteristics of planned realization in the next three-year period are: complete removal of mine danger from houses, house yards and infrastructure facilities in the Republic of Croatia as well as from over 2/3 of all agricultural areas.

REHABILITATION PROGRAMMES:

In line with the Law on Humanitarian Demining, mine risk education and mine victims assistance was conducted during this period with co-coordinative role of the Croatian Mine Action Centre and co-operation with non-governmental organizations, different institutions and international organizations and associations.

Mine/UXO risk education

Different mine risk education activities, marking of mine suspected area, possibility of getting an insight into mine situation through submission of MSA maps and CDs as well as using [CROMAC web portal](#) have a positive effect on the prevention of mine incidents, but also require additional activities of informing the public and media with mine action aspects.

In the period from 30 September 2009 to 30 September 2010, 6 mine incidents occurred, with 8 victims of which 1 received heavy physical injury, 3 received light physical injuries and 4 were killed. Five injured persons were civilians and 3 were deminers (2 killed and 1 with light physical injuries). All these incidents occurred within the borders of mine suspected area.

Croatian Red Cross implemented MRE in 49 municipal Red Cross societies, which are located in the vicinity of mine hazardous areas. Qualified instructors (42) organize lectures for children and adults in the continuous learning, repetition and reminders of the mine dangers. Lectures for adults are held at the premises of the Red Cross or elsewhere in the community (local councils, sports associations, firehouses, etc.), and education of children is carried out mostly in elementary and secondary schools. At MRE for adults special attention is given to the target - vulnerable population groups that are further at risk (returnees, farmers, ranchers, foresters, hunters, field workers and others), because due to their lifestyle they keep moving in the vicinity

AMENDED PROTOCOL II

of hazardous areas.

In the period from September 2009 until September 2010, "Children in mine environment" lectures were held in elementary schools in the organization of Civilian Homeland War Victims Association, Croatian Red Cross, CROMAC and County Police Administration anti-explosive units. There were also MRE activities by NGO Bembo (educational short movies), Homeland War Veterans Association from Virovitica-Podravina county (lectures "Caution, weapons and mines!") and Daska theatre (theatre plays „No, no MINES“). 15.000 "Beware of mines!" picture books were distributed to elementary school students as a part of "Beware of mines" project of Centre for Neohumanist Studies from Karlovac. Croatian Red Cross made new educational flyer in co-operation with CROMAC and thanks to Japan donation, an educational cartoon called "Expert" was made by Zagreb film Ltd. In 2010 there was also traditional media campaign "April- month of mine protection" on TV and radio stations and numerous other media related activities with the aim of MRE.

Providing assistance to mine victims

The Republic of Croatia has a developed structure of public health care and health care system that includes clinics, clinical centres, specialized polyclinics, hospitals and rehabilitation centres. All persons being involved in the incidents are entitled to health protection and acquisition of orthopaedic aids to the amount covered by the Croatian Health Insurance Institute. The rights are regulated by a number of laws, rules and regulations. Relevant state administration authorities were involved in solving the problems of mine victims relating to medical rehabilitation.

In year 2009, CROMAC started with two significant projects in co-operation with competent state administration authorities and non-governmental organizations. One is the project of unifying the data collected to create a unique database of mine victims. The data from all significant state administration bodies, ministries and CROMAC will be incorporated in one database. Other one is the project of editing a brochure in which all the laws and regulations governing the rights of mine victims and their families is listed in one place. Also, mine victims assistance project of social entrepreneurship development started in 2009 thanks to donors support to one NGO. Other various projects of financial assistance and education were enforced thanks to donors with the aim to help mine victims (scholarship, legal help, psycho-social assistance).

The National Strategy of the Unique Politics for Persons with Disabilities is currently being implemented. The implementation process is monitored and reported by the Committee of the Government of the Republic of Croatia for Persons with Disabilities. The National Strategy of Equalisation of Rights for the Persons with Disabilities passed by the Government of the Republic of Croatia for the period 2007 to 2015 is currently in force.

Individual assistance

The Republic of Croatia has highly developed legal framework relating to the persons with disabilities in realizing their legitimate rights and status. The status and various forms of rights are being realized through over 200 different laws and by-laws. There are 4 basic forms of mine victim assistance the ministries, different institutions, non-governmental sector, a number of organizations and individual initiatives take part in-medical care, physical rehabilitation, psychological help and social reintegration and professional and economic rehabilitation.

AMENDED PROTOCOL II

Also, Croatia has got a very well developed public health service structure and health care system that include clinics, clinical centers, specialized polyclinics, hospitals and rehabilitation centers. Clinical centers in Zagreb, Split, Rijeka and Osijek and one clinical hospital provide all forms of physical rehabilitation.

There are 29 specialized hospitals for physical rehabilitation in Croatia and one Institute for rehabilitation and orthopedic aids in Zagreb. The Ministry of Family, Veterans and Intergenerational Solidarity opened the centers for psychosocial help and assistance in all 20 counties of the Republic of Croatia and City of Zagreb aiming at providing the assistance to all people with disabilities including mine victims with war traumas including mine victims and members of their families.

Additional payment for better quality prostheses in the amount of 7.000 to 50.000 HRK is the most frequent form of individual support. Several dozens of persons ask for such type of support each year. Among other projects directly supporting the mine victims is the education of young people mine victims for the profession of prosthetics and their employment in the company Bauerfeind Ltd. from Zagreb. The project has been implemented since 2005. There are also certain projects conducted which directly financially support the procurement of computers, school books and equipment, assistance in procurement of small farming machinery for the future smaller farms, procurement of furniture, equipping houses, visits to the victims in their homes and rehabilitation centers, covering the rehabilitation and victim escort expenses.

Collective programs of rehabilitation and re-integration

On March 6, 2010, workshop entitled "Expansion of Psycho-Social and Economic Support Network" was held in the Grabik Youth Centre in Karlovac. The workshop was organized by Karlovac Mine Victims Association and MINE AID Association from Zagreb and it represents an introduction into the project of a consulting firm "Sintagma" from Nova Gradiška, approved at the ITF's (International Trust Fund for Demining and Mine Victim Assistance) public tender – component of socio-economic rehabilitation and reintegration of civil mine victims.

The aim of the entire project is to educate civil mine victims in Slavonia, Banovina and Gorski Kotar about the social entrepreneurship and, in that way, make their integration to the society and creating a potential social safety a lot easier. The project is approved for financing and Sintagma starts with its implementation in the next 18 months.

AMENDED PROTOCOL II

Form C **Technical requirements and relevant information**

Article 13,
paragraph 4 (c)

“The High Contracting Parties shall provide annual reports to the Depository [...] on [...]:

(c) steps taken to meet technical requirements of this Protocol and any other relevant information pertaining thereto;”

Remark:

High Contracting Party: **THE REPUBLIC
OF CROATIA**

Reporting for time period

from: **01/10/2009**

dd/mm/yyyy

to:

30/09/2010

dd/mm/yyyy

TECHNICAL REQUIREMENTS:

Technical requirements remain the same as in the report of 2009.

ANY OTHER RELEVANT INFORMATION:

The Republic of Croatia has destroyed all stockpiles of anti-personnel mines and initially retained 7000 pieces in accordance with Article 3 of the Ottawa Convention. During the time period of 01/10/2009 to 30/09/2010, 38 AP mines were used and destroyed for the purposes of training and certification of demining equipment. In the same time period, 17 pcs. of AP mines were destroyed during a training exercise for detection and removal of UXO. Currently, it has 5943 pcs. left in stock for the above mentioned purposes. All AP mines and other UXO are destroyed immediately or ASAP upon detection.

AMENDED PROTOCOL II

Form D **Legislation**

Article 13,
paragraph 4 (d) “The High Contracting Parties shall provide annual reports to the
Depository [...] on [...]:

(d) legislation related to this Protocol;”

Remark:

High Contracting Party: **THE REPUBLIC
OF CROATIA**

to: **30/09/2010**
dd/mm/yyyy

LEGISLATION:

The Legislation remains unchanged. All information on Legislation in Republic of Croatia is presented in The COMPLIANCE National implementation report of 2009.
--

AMENDED PROTOCOL II

Form E International technical information exchange, cooperation on mine clearance, technical cooperation and assistance

Article 13,
paragraph 4 (e)

“The High Contracting Parties shall provide annual reports to the
Depositary [...] on [...]:

(e) measures taken on international technical information exchange, on
international cooperation on mine clearance, and on technical cooperation
and assistance;”

Remark:

High Contracting Party: **THE REPUBLIC
OF CROATIA**

Reporting for time period

from: **01/10/2009**
dd/mm/yyyy

to: **30/09/2010**
dd/mm/yyyy

INTERNATIONAL TECHNICAL INFORMATION EXCHANGE:

Based on the Agreement on the transfer of tasks, Article 2, signed between the Croatian Mine Action Centre and CROMAC- Center for Testing, Development and Training (CROMAC-CTDT) on 30th October 2003, CROMAC-CTDT took over the activities and projects focused on testing of mine detection and mine clearance equipment, as well as research of new methods and technology.

International technical information exchange

- In April 2009 CROMAC-CTDT started the implementation of the project “Deployment of the Decision Support System for Mine Suspected Area Reduction” in Bosnia and Herzegovina. The project is financed by ITF with a USA grant. The project goal was to conceive a decision making support system for operational deployment in mine action centers within SEEMACC (Southeast Europe Mine Action Coordination Council) through implementation of a very advanced data fusion methodology. The project will be completed in November 2010.
- In September and October 2009 CROMAC-CTDT has conducted a training course *UXO Detection and Removal, Levels 2 and 3*, and in June 2010, *the 4th, specialist level*. The training courses were financed by the USA State Department through ITF. The courses were conducted in accordance with CWA 15464-3:2005: Humanitarian Mine Action - EOD Competency Standards and with IMAS. The candidates and the lecturers came from the region of Southeast Europe - Croatia, Bosnia and Herzegovina, Serbia, Macedonia, Slovenia and Montenegro.

AMENDED PROTOCOL II

- CROMAC-CTDT representatives visited South African Republic in early November, where they participated in the project entitled: *Measurement of Impulse Generated by the Detonation of Anti-tank Mines by Using the VLIP Technique*, organized by the Council of Scientific and Industrial Research (CSIR).
- In December 2009, HCR-CTRO team conducted testing of an MV-4 machine in Colombia
- In April 2010, CROMAC and CROMAC-CTDT were co-organizers of the 7th *International Humanitarian Demining Symposium* which was held in Sibenik, Croatia. The symposium was attended by some 170 participants from all over the world.
- In September 2010, CROMAC-CTDT representatives participated in the GICHD/UNMAS technology workshop with a presentation of testing, validation and verification of equipment used in demining.
- CROMAC - CTDT Director actively participates in SEEMACC activities.

INTERNATIONAL COOPERATION ON MINE CLEARANCE:

The international cooperation on mine clearance of the Republic of Croatia during the above mentioned period was performed thanks to the donors' contributions from different countries, organizations and individuals.

The European Union, the United States of America and the Kingdom of Norway had the biggest share in financing humanitarian demining activities.

Demining projects from the donation of the Government of the USA are implemented through International Trust Fund for Humanitarian Demining and Mine Victims Assistance (ITF). Norwegian donation is implemented through NGO-Norwegian Peoples Aid that performs humanitarian demining activities. The donation of the FR of Germany was implemented through Arbeiter Samariters Bund (ASB).

The Governments of Monaco and Japan have financed demining projects. Other donations are from different NGO's and organizations like AMCHAM, VIPnet, Lions club and Croatian-American Golf Association.

TECHNICAL COOPERATION AND ASSISTANCE:

The emphasis was put on presentation of Croatian experience in mine action within the international mine action community and diplomatic posts in the Republic of Croatia.

The establishment of Cluster for humanitarian demining created the opportunity for the export of Croatian knowledge and technology to foreign markets or in countries that have a mine problem. [Cluster](#), through its founders and its associated members, in one place ensures the capacity, resources and knowledge to carry out all activities related to mine action. As the knowledge, technologies and products greatly surpassed the needs of Croatia, the intention is to offer the same knowledge and resources to countries with mine problem for its faster removal. The main objective of this association is to improve efficiency through a variety of advanced economic processes: changing and improving methodology, components, machines, services and through adaptation and access to new regions, and all for the purpose of establishing a mine action as Croatian export product.

International cooperation in the area of sharing Croatian mine action experiences is currently being developed with eight countries. Four countries (Azerbaijan, Yemen, Libya, Ukraine) signed an agreement for cooperation, and with two countries (Egypt, Georgia) an agreement was made and is expected to be signed. Cooperation with Sri Lanka and Turkey will be carried directly through the Cluster for Humanitarian Demining, since they are interested in the Croatian manufacturers of equipment for humanitarian demining.

AMENDED PROTOCOL II

Form F Other relevant matters

Article 13,
paragraph 4 (f) “The High Contracting Parties shall provide annual reports to the
Depositary [...] on [...]:

(f) other relevant matters.”

Remark:

High Contracting Party: **THE REPUBLIC
OF CROATIA**

Reporting for time period
from: **01/10/2009** to: **30/09/2010**
dd/mm/yyyy dd/mm/yyyy

OTHER RELEVANT MATTERS:

The demining battalion (of the Engineering regiment) is responsible for clearance of all military areas (training areas, Air bases and military barracks) in Republic of Croatia. During the time period of 01/10/2009 until 30/09/2010 the Demining battalion cleared a total area of 139.892 m². In the clearance process 9 AP mines and 128 pcs. of UXO's was found and destroyed.

AMENDED PROTOCOL II

Form G Information to the UN-database on mine clearance

Article 11,
paragraph 2,

“2. Each High Contracting Party undertakes to provide information to the database on mine clearance established within the United Nations System, especially information concerning various means and technologies of mine clearance, and lists of experts, expert agencies or national points of contact on mine clearance.”

Remark:

High Contracting Party: **THE REPUBLIC
OF CROATIA**

Reporting for time period

from: **01/10/2009**

dd/mm/yyyy

to: **30/09/2010**

dd/mm/yyyy

MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

Mine clearance capacities include a complete equipment of 28 demining companies (27 commercial and 1 NGO-Norwegian Peoples Aid) that are authorized by Croatian Ministry of Interior to perform mine clearance and mine search activities. They also need to have accreditation from Croatian Mine Action Center to perform such actions. The firms have 844 employees in all operational units: 612 deminers, 67 auxiliary workers and 28 medical teams that consist of doctors, medical technicians and drivers with medical vehicles.

All the employees that work in mine clearance are wearing protective equipment that consists of flack jacket with protection for groins and helmets with visors. For special cases of UXO demolition, companies use ballistic suits. Following equipment is in usage for humanitarian demining activities: 690 metal detectors, 62 demining machines including all types (medium, light and heavy), excavators, machines for vegetation clearing and 24 mine detection dogs.

In Croatia, mine clearance actions are mostly performed as a combination of mechanical demining, manual detection and mine-searching dogs. Croatian Mine Action Centre Standard operating procedures also prescribe the entire methodology of humanitarian demining activities. Frequent use of demining machines puts Croatia among the leading states with industrial mine clearance.

AMENDED PROTOCOL II

LISTS OF EXPERTS AND EXPERT AGENCIES:

Mine clearance experts are employed in various institutions, which deal with mine action issues:

HCR (Croatian Mine Action Centre-CROMAC):

- Oto Jungwirth – Director,
- Mirko Ivanušić – Deputy Director
- Nikola Gambiroža – standardization, standard operating procedures, Demining Machines Evaluation Committee
- Tomislav Ban – quality assurance and quality control
- Davor Laura – general survey, making of projects, mine situation database
- Miljenko Vahtarić – planning, analysis and finances
- Neven Karas – legislative issues
- Heads of CROMAC Regional offices (Damir Stojković, Josip Čerina, Dubravko Krušarovski) – operational performance

CROMAC-CTDT Ltd.(Croatian Mine Action Centre - Centre for Testing, Development and Training) – conducts testing and certification of mine detection and mine clearance equipment; research and development of new mine detection and mine clearance methods and technology; and training in the field of mine action.

Slavko Majetić, owner of the firm DOK-ING, Ltd., is an expert for construction and production of mine clearance machines MV-4, MV-10, MV-20. Another Croatian company, Đuro Đaković, is also involved in construction and production of demining machines RM-KA 02.

There is one state owned demining company, one non-government organization (NPA - Norwegian Peoples Aid) and other demining companies are privately owned. There are 27 commercial companies that are authorized by the Ministry of the Interior and they regularly apply for public tenders for mine clearance and mine searching projects:

- BUMERANG Ltd.
- CENTURION Ltd.
- COR Ltd.
- DEMIN - KA Ltd.
- DETEKCIJA Ltd.
- DETEKTOR Ltd.
- DIZ EKO Ltd.
- DOK – ING RAZMINIRANJE Ltd.
- ENIGMA Ltd.
- HARDOX Ltd.
- HEKSOGEN Ltd.

AMENDED PROTOCOL II
