Form B Mine clearance and rehabilitation programmes

Article 131A/ b "The High Contracting Parties shall provide annual reports o the Depository ... on
 (b) mine clearance and rehabilitation programmes;"

Remark:

High Contracting Party: **HELLENIC REPUBLIC** reporting for time period from **Jan 01.2017 to Dec 31. 2017. Mine clearance pro-
grammes**

A huge ERW clearance programme is still under way in vast areas of Western Macedonia and Ipiros in the North-West part of the Hellenic Republic, in "suspect areas" containing Explosive Remnants of War dating from World War II and the 1946-1949 era. There are no properly defined minefields in this area and no maps, the number of dangerous devices to be removed is very large and the weather conditions are adverse for the most part of the year, resulting in the very slow progress of works. It is worth mentioning that the "suspect areas" to be cleared and secured in the mountains of Grammos and Vitsi alone, measure well over 40.000 hectares. — **From 1th January until 31st December 2017, 1.201.608 m² were cleared and secured in the above area.**

Rehabilitation programmes

There are no mine victims (**Note:** All minefields along the border with Turkey in the Evros Province are clearly defined and marked, well above any standard established by Amended Protocol II and the relevant NATO STANAGs, since 20th July 2009 all antipersonnel mines have been removed).
