---

**Steps taken to implement the provisions of Article 8:**

The Hungarian Government organized an implementation workshop on ERW clearance, removal and destruction for the CCW Protocol V High Contracting Parties and Observer States on 29-30 June 2009 in Budapest.

The workshop focused on the practical steps related to this issue. Participants were able to follow the daily practices of the Hungarian Defense Forces First EOD and Warship Battalion regarding ERW clearance, removal and destruction. During the workshop, presentations were delivered on various static and dynamic EOD techniques, equipments and their use, including state-of-the-art EOD robots, which are in daily use in Hungary and in foreign joint operations. As a special add-on, since the Danube River contains several ERWs from the WWII, a presentation of special underwater equipments and underwater ERW removal presentation was also organized.

The workshop was an important step toward the implementation of the CCW Protocol V, especially as being one of the first international open-ended workshops, organized under Article 8 of the Protocol V.

The invitation was extended to all relevant international organizations, the International Committee of the Red Cross, as well as non-governmental organizations active in the field. 15 countries and two organizations sent expert to the workshop.
